

Colour & design rules

The look and feel, locked. Every screen follows this.

THE COLOUR LADDER — LOUDEST TO QUIETEST

	Black	The background. Always pure #000000 — never a panel behind content.
	White	The one primary action per screen. A solid white pill with a dark label.
	Dark grey	Secondary buttons, beside the white one. Dark-grey fill + a very thin grey outline. The only bordered thing in the app.
	Blue #0A84FF	Identity, not action — links, usernames, the active tab, the verified seal, toggles that are on, the AI.
	Green	Accept · pick up a call · live · success.
	Red	Delete · decline · destructive.
	Yellow	Information & heads-up notices.
	Purple #8B5CF6	Held in reserve. The spare colour for anything the ladder doesn't cover — on hand, not used yet.

Every button is a full pill · white acts · grey (thin outline) is the only bordered thing · blue identifies.

THE DESIGN LANGUAGE

FULL-PILL BUTTONS, MATCHING BOXES

Every button is a full pill (both ends fully rounded). When a pill sits in the corner of a grey box, the box's corner rounds to **hug it** — box radius = pill radius + the gap — so corners never fight.

SOLID, NEVER OUTLINED

Grey boxes are **solid fills with rounded corners and no outline** — they separate from the black by their fill. The only border in the whole app is the thin one on a secondary button.

DIVIDER CUTS

The faint line between rows contrasts with what it sits on: a **black** cut on a grey box, a **grey** line on the black background. Always visible, never heavy.

WIDE, SHARP, EDGE-TO-EDGE

Screens run the full width to an 18px gutter — sharp and even, like the Home feed. **Never a narrow card floating in the middle.**

NO EDGE GLOW

No shiny rim that lights up around the screen as a finger nears the edge. Motion is quiet feedback, never a light show.

BRAND & VOICE

The product is **Atwe**; the assistant is **Atwe AI** — the swirl mark. It never shows another AI vendor's name. Copy is plain and calm — Apple / X restraint. No emojis in the app chrome.

THE FIVE WORLDS

Bottom nav, in order: **Home · Beam · Engine · Atwe AI · Account**. Every surface lives inside one of these.

VERIFIED SEAL

One check everywhere: a neutral **silver seal**, sized to the name beside it. Never blue, never a plain dot.

THEMES

Black-first (true black, near-white text), plus Light and System. Everything flows through colour variables, so a theme flips in one place; custom accent colours are supported.
