

Build plan — the whole road

Every remaining feature, split two ways: the ones I build entirely on my own, and the few that need one thing only you can give. Each is explained in plain language. Two of your custom asks (Pause/Away mode & @support accounts) are already done.

≈150

I build on my own — no involvement needed

12

Need one thing from you
(account · key · device · decision)

2 ✓

Your custom features — already shipped

PART 1 · THE SHORTLIST THAT NEEDS YOU

What needs you

For each of these I write all the code and design the whole experience — I just can't switch it fully on until you hand over the one piece named. I'll build each right up to that line and park it ready.

1 · Native iPhone & Android apps

The real apps in the App Store and Google Play, with true native phone notifications — not just the website saved to your home screen.

WHAT I NEED FROM YOU

An Apple Developer account and a Google Play account, plus a phone to test on.

Example: you create the Apple Developer account (~\$99/yr) and add me, or share the login; I build and upload the app, then you tap "Submit for review" in App Store Connect.

2 · Photos & video on real cloud storage

Moves all media out of the database onto proper cloud storage + a delivery network — the upgrade that keeps Atwe fast and cheap as it grows, and unlocks HD photos, longer video and big files.

WHAT I NEED FROM YOU

A storage-bucket + delivery-network account (e.g. Cloudflare R2 or AWS S3) and its keys.

Example: you open a Cloudflare account, create one "bucket", paste me the three keys; I switch all media over to it.

3 · The Atwe Card, Apple Pay & real payouts

A spendable Atwe card, tap-to-pay, real bank cash-outs at scale, business lending, and seller tax forms (1099-K) — the “real money” layer.

WHAT I NEED FROM YOU

A card-issuing / banking partner, your live payment (Stripe) setup, and the identity/compliance sign-off that comes with moving real money.

Example: you sign up with a card-issuing partner (e.g. Stripe Issuing or Marqeta) and complete their business verification; I wire the card program into the wallet.

4 · ID verification with a face scan

Genuine “prove you’re really you” identity checks — for high-value sellers, trust badges, or age checks.

WHAT I NEED FROM YOU

A chosen identity-check provider (the vendor + its key), and a privacy decision on handling face data.

Example: you pick a provider (Stripe Identity, Onfido or Persona) and give me the key; I add the “scan your ID + face” step where it’s needed.

5 · AI image generation & voice mode

AI that *creates* images (product photos, art) and that talks and listens in real time. (The text/writing AI you already have keeps working — these are separate abilities.)

WHAT I NEED FROM YOU

An image-AI and/or voice-AI provider account + key.

Example: you add an image-generation key; I add a “generate an image” button to the AI and an “AI product photo” tool for sellers.

6 · Anything that sends real email or texts

The email-template editor, scheduled email reports, weekly owner digests, and SMS alerts. I build all the tools; they just need a real pipe to send through.

WHAT I NEED FROM YOU

Your email-sending account (e.g. Postmark or SendGrid), and a texting account for SMS.

Example: you set up a sending account and give me the login; the tools I built stop just logging and start actually delivering.

7 · Full shipping, tax & delivery

Real shipping labels & live carrier rates, precise sales tax everywhere, and international / same-day delivery programs.

WHAT I NEED FROM YOU

A shipping provider (Shippo/EasyPost) key, a tax provider (TaxJar/Avalara) key, and delivery partners.

Example: you open a Shippo account and give me the key; sellers can buy real labels and buyers see live rates.

8 · In-person selling & multi-channel

Point-of-sale with card readers for selling face-to-face, and syncing stock across outside marketplaces.

WHAT I NEED FROM YOU

The hardware (card readers) and/or accounts on the outside channels.

Example: you order a reader from the POS partner; I connect the in-person checkout to the wallet.

9 · Public developer API & outside integrations

Letting other apps/tools connect to Atwe, plus hooks into outside hiring systems (ATS) and CRMs.

WHAT I NEED FROM YOU

A few product decisions (what the API exposes, is it free/paid) and the partner accounts to test against.

Example: you decide “the API is free for now and exposes X”; I build the keys, docs and connectors.

10 · Item-authentication guarantee

A “verified authentic” program for high-value goods (sneakers, watches, bags), so buyers trust big purchases.

WHAT I NEED FROM YOU

An authentication partner (a service that inspects/verifies goods).

Example: you partner with an authentication service; I add the “authenticated” badge and the routing flow.

11 · Legal & help content

I build the system that stores & versions your Terms, Privacy Policy and help articles — the actual wording is yours (or your lawyer's).

WHAT I NEED FROM YOU

The real policy text and help-article content.

Example: you paste me your Terms of Service; I version it, publish it, and show it in the app.

12 · Passkeys & device-tested security

Face-ID / fingerprint sign-in (passkeys) and a few security features I can build but can only truly confirm on a real phone.

WHAT I NEED FROM YOU

Your phone, for a quick test.

Example: I build passkey sign-in; you try “Sign in with Face ID” on your iPhone and confirm it feels right.

PART 2 · EVERYTHING I BUILD ON MY OWN

What I build without you

Pure code on what's already wired — the database, the wallet, web push, the AI key you already have, and the admin console. Each is built to the design rules, shipped one at a time, and checked off. Grouped for reading; the checklist tracks every one.

Admin · reach & growth

Push composer	Write a notification and send it to everyone's phones.
In-app banners (MOTD)	A dismissible message strip across the top of the app.
Scheduled & draft announcements	Write now, send later; keep drafts.
Audience targeting	Send to a slice — businesses, Pro members, inactive, one country.
“What's new” changelog	An in-app page of new features after each release.
Official Atwe account	A verified account you post platform news from.
Waitlist manager · A/B tests · gradual rollout	Collect sign-ups, test two versions, roll a feature to a few first.
Campaign manager · referral analytics	Plan growth pushes; see which invites actually convert.

Admin · people & staff

Advanced user filters	Slice the member list by any signal.
Admin notes & VIP tags	Private staff notes and labels on any account.
Bulk user actions	Act on many accounts at once.
Full account timeline	Everything a member did, in order.
Segments & saved views	Define reusable groups; save a filtered list to reopen.
Global search (⌘K) · notification bell	Jump to anything in admin; get alerted to new reports/disputes.
Staff session manager · dual approval	See/revoke staff sign-ins; require two staff for risky actions.

Admin · trust & safety

Strike system	Graduated warnings before a suspension.
Read-only account state	Freeze an account to view-only instead of a full ban.
Keyword blocklist · link/domain blacklist	Auto-hold posts with banned words; block bad links platform-wide.
New-account probation	Limit brand-new accounts until they earn trust.
IP / range blocking	Block abusive networks.
Case assignment & escalation	Route reports to the right staff, escalate the hard ones.
DMCA queue · moderator QA	Handle copyright takedowns; review moderator quality.
Geo restrictions · de-amplify · transparency report	Limit by country; quietly reduce reach; auto-generate a safety report.

Admin · money back-office

Manual wallet adjustment

Credit/debit a wallet with two-staff sign-off.

Cash-out review queue · per-user limits

Approve withdrawals first; set custom caps per member.

Suspicious-activity queue · fraud rules

Flagged money behaviour to review; auto-rules to catch patterns.

Reconciliation exports

Download the money ledger to balance the books.

Platform fee manager · dormant-money reports

Set Atwe's cut; find money sitting unclaimed.

Admin · commerce, analytics & ops

Global order search · listings moderation

Find any order; review/remove bad listings.

Category taxonomy · featured collections

Organise product categories; curate what's featured.

Platform promo codes · seller tiers

Atwe-wide discounts; rank sellers by quality.

Funnels · retention cohorts · anomaly alerts

Where people drop off; who keeps coming back; warn on spikes.

Custom date ranges · export · report builder

Analyse any period; download anything; build your own reports.

Error-log viewer · maintenance mode · job controls

See errors; a friendly "back soon"; run/pause background jobs.

AI cost · usage · prompt manager · model config

Track AI spend/use; edit AI prompts & switch models without a deploy.

App · content & feed

Articles (long-form)	Write full articles, not just short posts.
Rich text · document posts · more video	Bold/lists/links in posts; attach docs; video in more places.
Celebration posts	“New job”, milestones and other special posts.
History tab · topic snooze	Your recently-viewed; mute a topic for a while.
Community notes	Reader-added context on misleading posts.
Natural-language feed tuning	Tell the feed “show me less of this”.
Duet / Stitch	Remix and reply to others' videos.

App · Beam (messaging) & communities

Custom & animated reactions	More than the default emoji reactions.
Group topic threads	Organise a busy group into topics.
Team inbox & assignment	Assign customer chats to teammates.
Message templates · quick buttons · in-chat forms	Reusable replies; tappable buttons; collect info inside a chat.
Silent send · per-chat sounds · conversation analytics	Send without a ping; custom tones; response-time stats.
Roles v2 · rules gate · AutoMod	Finer group control; agree-to-rules on join; auto-moderation.
Community insights & monetization	Community stats and paid communities.
Collaborative docs · whiteboard · Beam bots	Shared docs, a whiteboard, and a bot platform inside chats.

App · calls & meetings

Larger group calls · scheduled meetings	More people per call; book a call for later.
Call recording & transcripts · live captions	Record calls with a written transcript; real-time subtitles.
Webinars / town halls · breakout rooms	One-to-many broadcasts; split a call into small groups.

App · jobs & networking

Connection degrees	1st / 2nd / 3rd-degree connections shown.
Verified job postings · career pages	A “verified employer” badge; a jobs page per business.
Advanced people search · recruiter projects	Powerful filters to find people; organise candidates.
Company insights · skills graph v2	Stats about a business; smarter skills matching.
Workplace verification · verified-org tiers	Confirm where someone works; levels of org verification.

App · sales & CRM

Lightweight CRM	Track leads and customers in one place.
Lead lists & alerts · smart links	Save leads and get notified; trackable share links.
Buyer-intent signals · AI prospecting	Spot who's ready to buy; AI finds & suggests leads.
Profile inquiry forms (AI)	A smart “contact us” form on a business profile.
Instant availability answers	AI answers “are you free Tuesday?” from your calendar.

App · Atwe AI

AI memory	The AI remembers your context between chats.
Proactive daily briefing	A short morning summary of what matters.
Search across your data	Ask the AI about your own posts, chats, orders.
AI receptionist · more agent tools · workflows	AI handles inbound for a business; does more; chains steps.
Recurring AI tasks · AI analytics analyst	Schedule the AI to do things; ask it about your numbers.
Inline charts · content labels · action audit log	AI draws charts; marks AI-made content; logs what it did.

App · store & commerce

Storefront themes	Sellers pick a look for their shop.
Typo-tolerant search · bulk listing tools	Finds results despite typos; add/edit many products at once.
Auctions · B2B & wholesale · offers to watchers	Highest-bid selling; bulk pricing; send a deal to people who saved it.
Delivery-promise dates	“Arrives by” dates on listings.
Creator revenue share · paid packs · live gifts	Split earnings; sell content bundles; tip during a live.
Brand-deal marketplace · marketing automation	Connect creators & brands; automated seller campaigns.
Starter packs · business referrals · premium placements	Curated setup bundles; businesses refer each other; pay to be featured.
Targeted ads v2 · Atwe Pro v2	Better ad targeting; a stronger paid membership tier.

App · platform & security

Account switching	Hold several accounts, tap to switch.
Advanced search operators	Power-user search syntax.
Offline queue v2	Actions you take offline sync when you're back.
Desktop app	Atwe on the computer.
Encryption posture v2	Stronger message privacy and a clearer promise.
Horizontal scale prep	Code readied to grow to many more users.

Some “solo” items are big (a full CRM, live studio, webinars) — those take longer, but still need nothing from you. I'll always build the best version, test it, and ship it before moving on.

ATWE · BUILD PLAN · ~150 SOLO · 12 NEED YOU · 2 SHIPPED
