

Every feature in the specification, verified against the real codebase.

An enterprise-grade audit of the “ATWE Competitor Feature Audit — Expanded Edition” (33 pages, 13 sections, 15+ platforms) against the shipping Atwe application — backend, database, frontend, realtime layer, payments, AI, and admin. Every one of the **425 features** was individually statused with code-level evidence. Nothing was skipped; nothing was assumed.

Methodology & how to read this audit

What was audited

All 425 individually listed features across the specification's 13 sections were cross-referenced against the actual Atwe source: the Express backend (server.js), the PostgreSQL schema (db.js), the full frontend (public/index.html, admin.html), the auth/billing/mail/push/STT/shipping/tax/finance modules, the realtime SSE layer, and the money test suite. Uncertain items were verified by direct code search rather than assumed (e.g. screen sharing, group @mention notifications, chat archiving, in-post video, custom status — each confirmed or ruled out in code before statusing).

The five statuses

 **COMPLETE** Fully implemented as intended (or beyond).  **PARTIAL** Exists but incomplete — the gap is named precisely.  **DIFFERENT** Exists but works differently — with an assessment of whether that's better or worse.  **MISSING** Does not exist — with what building it requires and a Small/Medium/Large size.  **N/A** Intentionally not part of Atwe — with the reasoning.

Counting rules

A feature marked Different counts toward coverage when the different implementation serves the same job (often deliberately better for a business platform — e.g. a real-money wallet instead of a token currency). Where the specification repeats one capability across several platform sections (threads-in-groups appears under Telegram, Discord, Slack and Teams), each row is statused in place, and the build is counted once in the roadmap.

The spec's own “needs manual verification” list

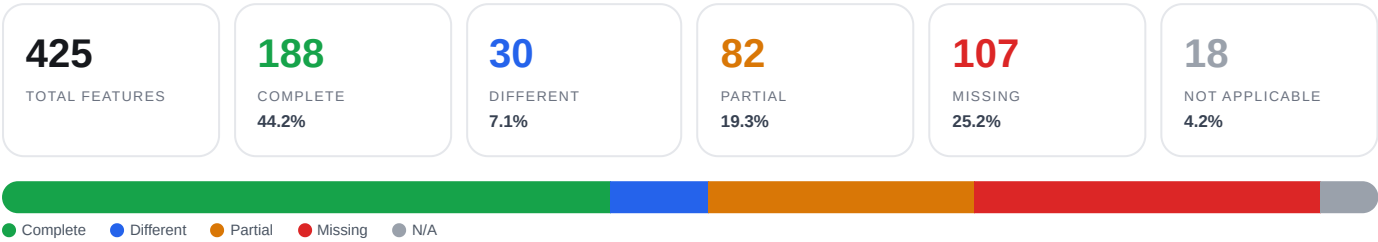

The final pages of your document flag competitor-side uncertainties (regional rollouts, retirements). Those affect the benchmarks, not Atwe's statuses — every Atwe-side status here is code-verified regardless.

Priority column

High = a competitive gap that matters for a business-networking platform in the launch window. Medium = worth scheduling. Low = fine to defer. Priorities are recommendations; the roadmap on the next pages sequences the High items.

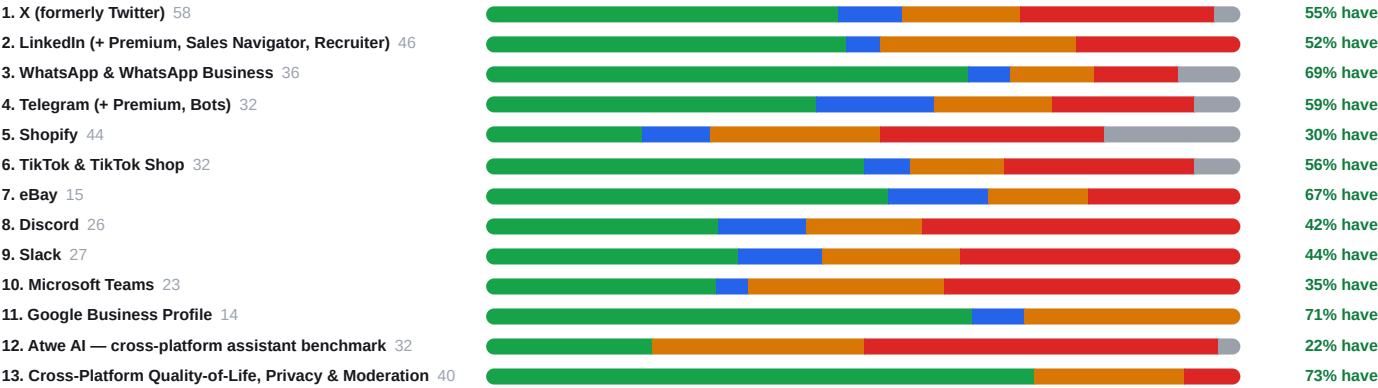

Executive Summary

Verdict first: **Atwe already covers 71% of the entire competitive surface** mapped from X, LinkedIn, WhatsApp, Telegram, Shopify, TikTok, eBay, Discord, Slack, Microsoft Teams and Google Business Profile — 51% fully (Complete or a deliberate, equivalent-or-better Different implementation) plus 19.3% Partial where the core exists and the remaining gap is precisely named. What's genuinely missing clusters into a small number of coherent programs rather than hundreds of scattered holes.

Where the real gaps live. The 107 Missing items are not 107 separate projects. About a third are deliberate skips (crypto, POS hardware, gaming mechanics, enterprise connectors — Section 6). The rest collapse into **five programs**: ① **AI that acts** — the receptionist, store-running agent, and search-over-your-own-data (the most-repeated gap across every platform benchmarked, and Atwe AI's stated ambition); ② **rich media** — HD/long video, big files, captions — all blocked on one enabler, moving media to object storage + CDN; ③ **team & meeting depth** — threads in groups, shared team inbox, meeting recording/notes; ④ **native-app dividends** — passkeys, Apple Pay, widgets, voice mode, maps — that arrive naturally with the iPhone build; ⑤ **trust extensions** — person-level ID verification and AI-content labeling.

Coverage by specification section

The 12 moves that matter most

Sequenced from the 189 Missing + Partial rows by (a) how often the gap repeats across platforms, (b) fit with Atwe's business-platform positioning, and (c) how much existing infrastructure it can reuse.

- 1 AI receptionist (auto-answer from business data + human handoff)**
The single most-repeated gap — it appears as WhatsApp's Meta Business Agent, Telegram's profile bots, and Shopify Inbox AI. Greeting/away + AI + business data all exist; this connects them.
- 2 AI that runs the store (Sidekick-class: analyze sales, create listings, storefront actions)**
Three stated Atwe AI goals in one program: analyze-sales AI (small), photo-to-listing (medium), create/edit-listing agent tools using the existing confirm-card pattern (medium).
- 3 Search across your own data (AI RAG)**
"What did that supplier quote me?" — retrieval over your posts, chats, orders, files. Unlocks profile/file summaries and real answers, not just drafting.
- 4 Team inbox for Beam (assign business DMs to team members)**
business_team permissions already exist for orders/Q&A/reviews/jobs — extending them to conversations is the #1 multi-seat business ask.
- 5 Threads inside groups**
One build closes matching rows in Telegram, Discord, Slack AND Teams. The clearest structural Beam gap.
- 6 Media pipeline: object storage + CDN**
Not a feature — the enabler. HD media, long video, big files, and captions are all blocked on moving media out of base64-in-Postgres. Do it before the iOS app ships.
- 7 Apple Pay via Stripe + passkeys**
Both small-to-medium, both dramatically better on iOS. Sequence them with the app.
- 8 Account switching (personal ⇄ business)**
Owners already need two accounts; a token switcher is contained and high-satisfaction.
- 9 Meeting intelligence (record → transcribe → AI notes)**
Covers Slack huddle notes, Teams recap, Telegram transcription rows in one program. STT module already exists.
- 10 Proactive AI briefing + scheduled AI tasks**
The digest exists; delivering it proactively (flusher + push) is small. Recurring member-defined AI tasks follow.
- 11 ID verification (person-level)**
Anti-impersonation trust for a business network; Stripe Identity fits the existing verification flow.
- 12 Document/PDF posts**
Decks and one-pagers are core business content (LinkedIn's document carousel). Pairs with the media pipeline.

Full Feature Audit — all 425 features

Every feature from every section of the specification, in the specification's own order. Evidence names the actual routes, tables, functions and modules found in the code. No feature was skipped.

FEED & TIMELINE					
FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
For You (algorithmic timeline) Personalized, ranked feed of recommended posts.	COMPLETE	Engagement+recency ranking with per-viewer boosts (followed hashtags, decayed author affinity, friend-of-friend, dwell time, recent searches), exploration slots for fresh creators, topic-cluster diversity, already-seen suppression, admin-tunable live ranking weights + per-signal analytics.	server.js /api/social/feed · feed_impressions , post_dwell	Goes beyond X: the ranking is observable and tunable from the admin Feed tab.	—
Following timeline Reverse-chronological feed of accounts you follow.	COMPLETE	Following scope is strictly chronological, with reposts resurfacing by repost time and 'Reposted by' attribution.	server.js feed scope=following	—	—
Custom / list timelines User-built feeds from curated lists or saved searches; AI-powered custom timelines.	PARTIAL Small	Lists exist with full CRUD + member timelines (GET /api/social/lists/:id/timeline), reachable from the Me hub and profile 'Add to list'.	server.js lists, list_members	Missing: lists as pinned home-feed tabs; saved-search timelines; AI-built timelines.	Low
Bookmarks & bookmark folders Save posts privately; folders to organize them.	COMPLETE	post_bookmarks + bookmark_folders with folder filter bar, manager, 'Save to folder' picker, and a Collections home tab.	db.js, index.html acBmkFolderBar	Folders are free for everyone (X gates them behind Premium).	—
Topic / video snooze Temporarily mute topics or videos in the For You feed.	DIFFERENT	Muted keywords (muted_keywords) hide matching content everywhere; 'Not interested' removes a post and down-ranks its author.	server.js MUTE_FILTER, post_hides	Atwe's mute is permanent (user-managed), not a timed snooze. A 30-day expiry column would close the gap.	Low
Surveys / in-feed polls in For You Native survey cards inside the For You feed.	COMPLETE	Poll posts render as native cards in both feed scopes with vote tallies.	index.html poll composer/rendere r	No images inside poll options.	—
Carousel layout for multi-image posts Posts with 2+ images display as a swipeable carousel.	DIFFERENT	Multi-image posts (≤4) render the X-style mosaic grid (.ac-imggrid n2/n3/n4) with a tap-to-view full-screen viewer; chat messages use a true swipe carousel.	index.html acPostMedia, .msg-imgcar	Grid instead of swipe in the feed — this matches X's real behavior; the PDF describes the carousel variant.	—
History tab (viewed posts) A tab showing posts you've previously viewed.	MISSING Small	post_views already records every viewer/post server-side (used for view counts + analytics) — no member-facing history screen reads it.	db.js post_views	Would be a thin new endpoint + screen over existing data.	Low
POSTING & PUBLISHING					
FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Text posts Short posts; longer posts for Premium.	COMPLETE	Core post composer with @/##/\$ linkification, mention autocomplete, reply scopes.	server.js POST /api/social/post s	Single global length policy — no paid character tiering.	—
Edit post 1-hour window to edit a published post.	COMPLETE	PATCH /api/social/posts/:id, author-only, 1-hour POST_EDIT_WINDOW_MS, 'Edited' label, hashtag re-index.	server.js, posts.edited_at	Free for everyone (X charges).	—
Polls Attach a multi-option poll.	COMPLETE	Poll composer attachment; votes tallied on the card.	index.html acAttachPick('p oll')	—	—
Text formatting (bold/italic) Rich formatting in posts.	MISSING Medium	Post bodies are plain text — only entities (@, #, \$, links) are styled.	index.html acLinkifyPost	Needs a safe rich-text composer + renderer. Low value for a business feed at launch.	Low
Quotes & reposts Repost or quote-post with commentary.	COMPLETE	post_reposts + posts.quote_id; quote embeds render flat; reposts resurface in Following.	db.js, server.js	—	—
Quick-add saved/liked post to a new post Quote a saved or liked post into a fresh post.	MISSING Small	Quote-post exists but there is no 'from Bookmarks/Likes' shortcut in the composer.	—	Pure composer affordance over existing quote infrastructure.	Low
Livestream studio Dedicated studio interface for going live.	PARTIAL	Go Live exists — one-to-many video broadcast + audio Spaces + group live, with live shopping pin.	index.html goLiveSheet, /api/live/*	Missing: a studio UI (scenes, overlays, stream tools). The broadcast itself works today.	Low
Threads Chain multiple posts into a connected sequence.	COMPLETE	Thread composer inserts a 2–25 segment self-reply chain (root on the main feed, rest chained).	server.js POST /api/social/thr ead	—	—

Posting & Publishing					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Media posts (photo/video) Attach images and video; long/HD uploads on paid tiers.	● PARTIAL Medium	Photos (≤4, mosaic grid) + GIFs on main posts; video ships via Reels/shorts (feed_posts) and video stories (~3.5MB cap).	server.js cleanImages/cleanMedia	Missing: native video on main feed posts, and any long/HD video (competitors allow hours/GB). Real fix is object storage + CDN first (see Architecture).	Med
Articles (long-form) Publish formatted long-form articles.	● DIFFERENT	Long-form publishing exists as Newsletters — issues with covers, subscriber notifications, and paid tiers.	server.js newsletters, newsletter_issues	Distribution is subscription-based rather than a feed 'Article' card. A feed card linking issues would bridge it.	Low
Scheduled posts & drafts Schedule posts; synced drafts.	● COMPLETE	posts.scheduled_at (feeds hide until live) + a scheduled-posts manager; post_drafts are server-saved (cross-device).	server.js /api/social/scheduled, /api/social/drafts	—	—
Paid promotion label Disclosure label for sponsored content.	● COMPLETE	Promoted posts carry an 'Ad' label; sponsored marketplace slots carry 'Sponsored'.	index.html acPostCard, acListingCard	—	—
Updated video editor + green-screen In-app video editor incl. green-screen.	● MISSING Large	Video is uploaded as-is; no editing tools.	—	On iOS the native camera/photo pipeline covers basic needs; a full editor is a large media investment.	Low
Apple Intelligence Writing Tools Native OS writing tools inside the composer (iOS).	● N/A	OS-level iOS feature — it lights up automatically in any standard text input in the upcoming native app.	—	Atwe additionally ships its own composer AI (improve/rephrase/professional/funny) on every surface.	—
Profiles & Identity					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Verification / blue check Paid verification badge.	● DIFFERENT	users.verified renders the neutral silver seal everywhere (one badge system, size-calibrated); business verification is a request → admin approve flow.	index.html vbadge, admin.html setBizVerify	Atwe's model is earned/reviewed verification, not paid self-serve — a deliberate trust posture worth keeping.	—
Gold / grey / affiliate badges Org verification; affiliate badges for linked accounts.	● COMPLETE	Affiliation badges: business invites member (two-sided approval) or custom upload → admin queue; org logo renders after the check and taps to the org.	server.js affiliations, aff_uploads	Direct equivalent of X Verified Organizations.	—
Profile customization Header, bio, links, custom app icons.	● COMPLETE	Banner, avatar, headline, bio, location, website, business CTA pill, featured row, pinned post, highlights.	index.html profileOverlay	No custom app icons (native-app perk to consider later).	—
Starter packs Curated bundles of accounts to follow for new users.	● DIFFERENT	Onboarding serves the same goal: topic chips + same-industry people suggestions seeded into the follow graph on day one.	server.js /api/onboarding/*	Not shareable member-curated packs — that would be a small addition on the lists system.	Low
Redesigned profile Video section Dedicated Video tab on each profile.	● PARTIAL Small	The profile Media tab shows photo/video posts.	index.html acProfTab	No video-only tab; trivial filter once video volume justifies it.	Low
About this account Transparency panel: account origin/history.	● PARTIAL Small	'Joined <Month Year>' on every profile; business accounts are visually distinct (app-shape avatar).	index.html acRenderProfile	No full panel (username history, location). Small trust addition.	Low
ID verification (government ID) Gov-ID verification for an 'ID verified' label.	● MISSING Medium	Business verification exists; no person-level ID verification.	—	Stripe Identity would slot into the existing verification flow. Meaningful anti-impersonation signal for a business network.	Med
Engagement & Discovery					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Reply prioritization Verified/Premium replies ranked higher.	● MISSING Small	Replies render chronologically.	—	Deliberate neutrality is defensible; a 'verified first' sort toggle would be small.	Low
Radar (real-time search) Real-time monitoring of topics/keywords.	● MISSING Medium	Search + trending exist; saved alerts exist for jobs and marketplace queries only.	—	A keyword-watch on posts reusing the saved-search pattern would cover the core.	Low
Communities Topic-based group spaces.	● COMPLETE	Communities: umbrella + auto announcement channel + joinable sub-groups + discovery.	server.js /api/communities	Lives in Beam (X is retiring theirs — the PDF notes it).	—
Community Notes Crowdsourced fact-check notes on posts.	● MISSING Large	Trust layer today = AI auto-moderation + reports + admin queue.	—	A crowd program needs contributor reputation + consensus scoring — a heavy system. Not a launch blocker.	Low
Search & trending Keyword search, trends, cashtags.	● COMPLETE	Global search (11 scopes), Trending widget, advanced post operators, recent searches, and full cashtag pages.	server.js /api/search, /api/social/trending	—	—
Notifications + Priority tab Notifications with a dedicated Priority tab.	● PARTIAL Small	Full notification feed with per-category prefs, quality filters (X-style), quiet hours, deep links.	server.js notify(), NOTIF_FILTERS	Missing: a Priority/All split in the notifications screen.	Low

Engagement & Discovery					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Lists User-curated account groups viewable as a feed.	● COMPLETE	lists + list_members + member timeline endpoint; 'Add to list' on profiles.	server.js /api/social/list s	—	—
Improved Cashtags Enhanced ticker experience for finance discovery.	● COMPLETE	\$TICKER pages: live quote, canvas area chart (1D–ALL), Top/Latest post streams, inline price cards on posts with sparklines, brand logos.	server.js /api/cashtag, finance.js	Already beyond X's implementation; degrades gracefully with no finance key.	—
Audio & Live					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Spaces (live audio) Host/join live audio rooms.	● COMPLETE	Audio Spaces: stage + listeners, raise-hand queue, promote/demote (≤10 speakers), WebRTC mesh over the SSE signal layer.	server.js /api/live/*, index.html SPACE	—	—
Messaging					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
X Chat / DMs Direct messaging; encrypted chat; shared media view.	● COMPLETE	Beam DMs: full feature set (reactions, edits, replies, forwards, pins, stars, search, media, meta-cards).	server.js at_messages	Not E2EE — encrypted in transit with an honest in-thread notice (deliberate; see WhatsApp section).	—
Group chats in X Chat Multi-person group messaging.	● COMPLETE	Groups + channels with full per-message DM parity, multi-admin, invite links, member management.	server.js at_groups	—	—
Message requests (verified gating) Restrict inbound DMs.	● COMPLETE	Chat requests inbox + 'Who can contact you' contact-privacy + opt-in connection-gated DMs.	server.js chat_requests, dm_connections_o nly	Gates by relationship rather than paid verification — better fit.	—
Creator Monetization					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Creator revenue sharing Payouts from engagement by Premium users.	● MISSING Large	No engagement-pool payouts.	—	Different economics (requires a subscriber pool to fund it).	Low
Creator subscriptions Paid monthly subscriptions for exclusive content.	● COMPLETE	Multi-tier creator subs (≤5 tiers, levels), Stripe recurring + real cancel-at-period-end, webhook renewals.	server.js creator_subs, creator_tiers	—	—
Exclusive / subscriber-only threads Paywall specific threads.	● COMPLETE	posts.subscribers_only + min_tier_level: locked teasers on the profile, hidden from feeds for non-subscribers.	server.js SUBONLY_FEED_FIL TER	—	—
Tips One-off payments to creators.	● COMPLETE	Tips \$1–\$500 with presets, Stripe or wallet balance, recipient summary.	server.js /api/tips	—	—
Media Studio Advanced media management & monetization dashboard.	● MISSING Medium	Per-post analytics + Ads Manager exist; no media library dashboard.	—	—	Low
Free Premium via subscribed followers Enough paying followers unlocks Premium free.	● MISSING Small	—	—	—	Low
Analytics & Pro Tools					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Post & account analytics Impressions, engagement, audience metrics.	● COMPLETE	Per-post analytics (impressions, uniques, engagement rate, 14-day trend) + profile views + business analytics.	server.js /api/social/post s/:id/analytics	—	—
X Pro (TweetDeck) Multi-column power-user dashboard.	● MISSING Large	Desktop already has the two-pane Beam layout + right rail; no multi-column deck.	—	—	Low
AI (Grok)					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Grok assistant In-app AI: ask, summarize, edit pics, voice.	● COMPLETE	Atwe AI: dedicated world + woven-in assists (composer, chat, profile, feed digest, explain, translate) + agent actions with confirm cards.	server.js /api/chat, /api/ai/*	Image editing and voice conversation are the two missing pieces (rows below).	—
Grok Voice mode + widgets Voice conversations + home-screen widgets.	● PARTIAL Medium	Voice input exists (browser SpeechRecognition into the AI composer).	index.html voice input	Missing: spoken replies (conversational voice mode) and OS widgets — both natural iOS-app work.	Med
Block Grok from editing a photo Consent opt-out for AI photo edits.	● N/A	Atwe AI does not edit member photos, so the consent control has nothing to gate yet.	—	Adopt this pattern on day one if AI image editing ships.	—
AI feed tuning (natural language) Adjust your feed by asking the AI.	● MISSING Medium	Feed personalization is signal-driven; admin can tune weights; members have mute/not-interested, not NL control.	—	Could map NL requests onto the existing mute/interest signals.	Low
Edit profile picture with AI Generate/edit your avatar in-app.	● MISSING Medium	No image generation anywhere (text-only AI).	—	Depends on adding an image-gen provider (see AI section 12).	Low

SETTINGS, PRIVACY & ACCESSIBILITY

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Privacy controls Protected posts, reply controls, blocking, muting.	● COMPLETE	Reply scopes (everyone/following/mentioned/verified), blocks (two-way enforced), account+keyword mutes, presence granularity, private profile-views, connection visibility.	server.js account-privacy routes	No private/protected accounts — profiles are public by design (documented, deliberate).	—
Reduced / no ads Fewer or zero ads on paid tiers.	● MISSING Small	Promoted content shows to all members.	—	A Pro perk toggle would be trivial to add (feed already knows the viewer's plan).	Low
Passkeys / 2FA Passwordless login + two-factor.	● PARTIAL Medium	TOTP 2FA (RFC 6238) + single-use recovery codes + QR device-link login + revocable device sessions.	auth.js, /api/auth/2fa/* , /api/auth/link/*	Missing: WebAuthn passkeys. Face ID unlock arrives naturally with the iOS app.	Med
Accessibility (alt text, captions) Alt text, video captions, display adjustments.	● PARTIAL Medium	Image alt text (+AI generation), focus rings, reduced motion, larger text, aria-live announcer, labeled controls, RTL.	index.html ally layer	Missing: video captions (no caption track support).	Med

2

LinkedIn (+ Premium, Sales Navigator, Recruiter)

Maps to Atwe: Home / Engine · 46 features audited

PROFILES & PROFESSIONAL IDENTITY					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Professional profile Structured CV-style profile.	● COMPLETE	Experience (company-linked), education, certifications, skills, featured, recommendations, headline/bio, profile strength meter.	server.js experiences, education, certifications	—	—
Skills & endorsements List skills; connections endorse.	● COMPLETE	user_skills + skill_endorsements + AI skill assessments (5-MCQ quiz → verified-skill badge at ≥70%).	server.js /api/skills, skill_assessments	Assessments go beyond LinkedIn's retired quizzes.	—
Open to work / hiring badges Signal job-seeking or hiring status.	● PARTIAL Small	#OpenToWork ring (off/recruiters/everyone visibility) + worker listing.	server.js otw_visibility	Missing: an employer-side 'Hiring' badge/frame.	Low
Creator mode / newsletters Creator tools and native newsletters.	● COMPLETE	Newsletters with covers, issues, subscriber notifications, paid tiers.	server.js newsletters	—	—
Profile / cover story video Short intro video on the profile photo.	● MISSING Small	—	—	Video stories exist; wiring one as a profile intro would be small-medium.	Low
Company / business pages Dedicated org pages with followers & updates.	● DIFFERENT	A business IS an account — employer surface, storefront, jobs, followers, analytics, hours, team seats — no separate page entity.	users.account_type	Deliberate architecture: one identity to maintain instead of person+page. Strength, not gap.	—
Recommendations Written peer recommendations.	● COMPLETE	Author writes → subject approves → visible; request flow; review queue.	server.js recommendations	—	—
Who viewed your profile See who viewed you; history on Premium.	● COMPLETE	90-day viewer list + 7-day teaser, 24h dedup, private-browsing reciprocity, block-aware; Pro-gate flag ready (off at launch).	server.js profile_views, PROF_VIEWERS_PRO_GATED	—	—
Verifications (identity & workplace) Free ID and employer verification badges.	● PARTIAL Medium	Business verification + affiliation badges (workplace linkage, two-sided approval).	server.js affiliations	Missing: person ID verification (same item as X's gov-ID row).	Med

FEED & CONTENT					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Professional feed Algorithmic feed from your network.	● COMPLETE	For You with industry-category boosts, connection graph signals, professional content mix.	server.js feed	—	—
Polls & celebrations Poll posts and milestone posts.	● PARTIAL Small	Polls ✓.	—	Missing: a celebration/milestone post type (new role, work anniversary). Small template addition.	Low
Short-form vertical video feed TikTok-style vertical video tab.	● COMPLETE	Immersive Feeds surface + 'Shorts to discover' (out-of-network) with the TikTok-style engagement rail.	server.js /api/feedposts/discover	—	—
Collaborative articles Community-contributed AI-prompted articles.	● MISSING Large	—	—	—	Low
Saved posts / collections Bookmark posts and organize them.	● COMPLETE	Bookmarks + folders + Collections tab.	db.js post_bookmarks	—	—
Posts, articles, documents Text, long-form, and PDF/document carousels.	● PARTIAL Medium	Posts ✓; long-form via newsletters (Different).	—	Missing: PDF/document carousel posts — genuinely useful for a business audience (decks, one-pagers).	Med
Video & LinkedIn Live Native video and live broadcasting.	● COMPLETE	Video reels/stories + Go Live broadcasts (solo, group, Spaces).	server.js /api/live	—	—

Feed & Content					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Hashtags & follows Follow topics/hashtags.	● COMPLETE	hashtag_follows + tag pages + feed boost + Explore chips.	server.js /api/social/hash tag	—	—
AI writing assistance AI-drafted posts, outreach, profile insights.	● COMPLETE	/api/ai/write (12 tasks) in the post composer, chat composer, profile editor, selection toolbar.	server.js AI_WRITE_TASKS	—	—
Scheduled posts Natively schedule posts.	● COMPLETE	Scheduling + manager.	server.js /api/social/sche duled	—	—
Networking & Messaging					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Connections (1st–3rd degree) Degree-based network graph.	● PARTIAL Small	Real request → accept graph, mutual-connection hints, friend-of-friend suggestions + feed boost, 'Followed by people you follow' proof.	server.js connections, FOLLOWED_BY_SQL	Missing: explicit 2nd/3rd-degree labels in UI (the graph data supports computing them).	Low
Unlimited people browsing Browse profiles without commercial limits.	● COMPLETE	No browsing caps exist at any tier.	—	Everyone gets what LinkedIn sells as Premium.	—
Voice messages in DMs Record and send audio in chat.	● COMPLETE	Voice notes + automatic transcript captions both sides.	server.js media_kind audio, stt.js	—	—
Messaging + InMail DMs; paid credits to reach non-connections.	● DIFFERENT	Open DMs gated by chat requests + contact privacy; anyone can be reached, recipient controls.	server.js canContact	No paid InMail scarcity — openness is Atwe's model. Revisit only if spam pressure demands it.	—
TeamLink Warm intro paths through teammates' networks.	● MISSING Medium	—	—	—	Low
Scheduled messages Schedule a DM to send later.	● COMPLETE	scheduled_messages + flusher + manager (DM & group).	server.js flushScheduledMe ssages	—	—
Jobs & Hiring					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Job listings & applications Search and apply; Easy Apply.	● COMPLETE	Jobs board with filters, save, alerts; Easy Apply attaches a resume snapshot + AI cover note; screening questions with knockouts.	server.js /api/jobs	—	—
Job posting (employer) Post roles and manage applicants.	● COMPLETE	Post/edit/delete, free-tier cap (3 active), boost, applicant pipeline with statuses + notifications.	server.js jobs, job_application s	—	—
Candidate pipeline / projects Shared projects, pipelines, internal notes.	● PARTIAL Medium	Pipeline statuses (applied → hired) + bulk moves + team job permissions.	server.js APPLICANT_STATU SES, business_team	Missing: shared hiring notes and multi-job candidate projects.	Med
Salary & interview prep Salary insights and interview prep tools.	● COMPLETE	Salary insight (peer median + band + badge) and AI interview prep (questions + tips) — free, not Premium-gated.	server.js salary-insight, interview-prep	—	—
Verified job postings Trust mark on a job/company.	● PARTIAL Small	Jobs display the poster's verified-business badge.	—	Missing: per-job verification stamp; small UI addition on existing signals.	Low
Applicant insights How you rank against the applicant pool.	● COMPLETE	'How you match' score (0–100 + skills to highlight), applicant counts, early-applicant flag.	server.js /api/jobs/:id/m atch	—	—
Recruiter search & filters Advanced candidate search, 30+ filters.	● PARTIAL Medium	Candidates board with skill/location/schedule/remote/rate filters + saved candidates + AI matchmaker rank.	server.js /api/candidates	Missing: deep filter set (boolean, years-of-experience, education filters).	Med
ATS integrations 28+ applicant-tracking-system connectors.	● MISSING Large	—	—	—	Low
AI-assisted job matching / 'Jobs for you' AI recommends roles, tailors applications.	● COMPLETE	AI matchmaker (retrieval + ranked shortlist with reasons), AI cover notes, applicant ranking for employers.	server.js /api/ai/jobmatc h	—	—
Sales / Prospecting					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Advanced lead & account search 50+ filters for B2B prospecting.	● PARTIAL Large	Business directory (industry, verified, near-me) + people search with in-network ranking.	server.js /api/businesses/ directory	Missing: a purpose-built prospecting search (size, role, activity filters). Big Engine opportunity post-launch.	Med
Real-time alerts (leads) Job-change and content alerts on saved leads.	● PARTIAL Medium	Alert infrastructure exists (job alerts, price-drop, restock).	server.js saved_searches	Missing: alerts on people/accounts (job change, new post).	Low

SALES / PROSPECTING					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Account IQ / Lead IQ AI-summarized account and lead intel.	● MISSING Medium	AI business analytics exist for your OWN business only.	—	An 'AI brief on this business' from public data would be a natural Atwe AI action.	Med
Smart Links Trackable content links.	● MISSING Medium	Payment links track pays; no trackable content links.	—	—	Low
Lead & account lists Save leads/accounts to lists.	● PARTIAL Medium	Saved candidates, contacts, chat labels, user lists all exist.	—	Missing: a dedicated sales-lead list with pipeline states (ties to the CRM theme).	Med
Buyer intent signals Signals showing buying interest.	● MISSING Large	—	—	Profile views + storefront/product views could power a lightweight version later.	Low
CRM sync Bi-directional Salesforce/HubSpot sync.	● MISSING Large	—	—	—	Low
AI-assisted prospecting messages Personalized outreach grounded in the lead's profile.	● PARTIAL Small	AI drafts replies/messages (write tasks, agent draft_reply).	server.js /api/ai/write	Missing: auto-grounding the draft in the target's profile/activity. Small prompt+retrieval change.	Med

LEARNING & ANALYTICS					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
LinkedIn Learning Professional course library.	● COMPLETE	Courses/LMS: modules, lessons (video+notes), progress, free/paid enrollment from wallet, teaching dashboard, profile surfacing.	server.js courses, course_lessons	Atwe hosts creator-made courses rather than licensing a library.	—
Business insights Headcount trends, hiring patterns.	● MISSING Large	—	—	Needs longitudinal org data; natural once business adoption grows.	Low
AI learning coach Conversational coach recommending courses.	● MISSING Small	Courses exist; AI doesn't recommend them.	—	Small Atwe AI retrieval action over the course catalog.	Low
Content & page analytics Post performance and follower analytics.	● COMPLETE	Per-post analytics + business analytics (views, followers, reach, hiring) + shop analytics.	server.js /api/business/analytics	—	—

WhatsApp & WhatsApp Business

Maps to Atwe: Beam · 36 features audited

CORE MESSAGING					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
1:1 & group chat Text, media, voice notes; groups.	● COMPLETE	Full Beam DM + group stack.	server.js at_messages, at_groups	—	—
Voice & video calls 1:1 and group calling.	● COMPLETE	WebRTC 1:1 + group mesh (≤8) + shareable call links; TURN support; non-trickle ICE for iOS reliability; call-log cards; silenced-unknown-callers.	index.html startCall, /api/rt/*	—	—
File & media sharing Documents, photos, video, contacts, location.	● COMPLETE	Photos (multi), video, files, voice, contact cards, location pins, live location.	server.js media_kind	File size is capped (see Telegram 'large files' row).	—
Channels (broadcast) One-to-many broadcast channels.	● COMPLETE	Broadcast groups (admin-post-only) + community announcement channels.	server.js at_groups.broadcast	—	—
Multi-device linking One account on multiple devices.	● COMPLETE	QR device-link login (hashed single-use codes, ~90s TTL, approval sheet) + revocable session store; no device cap.	server.js device_link_codes, auth_sessions	—	—
Username handles @usernames replacing phone numbers.	● COMPLETE	Native @handles since day one; premium-handle marketplace on top.	users.username	The PDF itself flags this as an Atwe advantage while WhatsApp catches up.	—
Message reactions, edit & pin Reactions, edit window, pinned messages.	● COMPLETE	All three in DMs AND groups; pin banners with SSE refresh.	server.js reactions/edit/ pin routes	—	—
HD media sharing Send photos/video in higher resolution.	● PARTIAL Medium	Media is client-downscaled and size-capped (~3.5MB video).	index.html downscaleImage	Missing: an HD/original-quality toggle. Gated on object-storage migration (Architecture).	Med
End-to-end encryption E2EE by default.	● DIFFERENT	TLS in transit + server-side storage for multi-device history; every thread shows an honest 'not E2EE' privacy notice with an explainer.	index.html acChatPrivacyNotice	A deliberate, disclosed posture (E2EE would break server-side sync/AI features). Revisit for a 'secret chat' mode post-launch.	Med
Voice messages Record-and-send audio.	● COMPLETE	Voice notes + auto transcripts.	—	—	—
Status / Stories Ephemeral 24-hour updates.	● COMPLETE	Photo/video/text stories, close-friends audience, viewers list, replies + quick reactions, highlights.	server.js stories	—	—

CORE MESSAGING					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Communities Group-of-groups with announcements.	● COMPLETE	Communities + auto announcement channel + sub-groups.	server.js communities	—	—
Disappearing messages Auto-delete after a set time.	● COMPLETE	Per-conversation timers (24h/7d/90d) + view-once media.	server.js dm_disappearing	—	—
Chat lock & locked chats Lock chats behind passcode/biometric.	● COMPLETE	Locked/hidden chats (bcrypt PIN) + native-style passcode pad + app lock + per-section locks; locked chats can never be exported.	server.js chat_locked, index.html alShowPin	Biometric unlock arrives with the iOS app.	—
Polls in chats Polls in group and 1:1 chats.	● COMPLETE	Poll meta-cards in both.	index.html acAttachPick('poll')	—	—
Meta AI in-chat Ask AI questions / generate images inside chats.	● PARTIAL Medium	Composer AI (improve/rephrase/translate/suggest-reply/summarize-chat) + selection 'Fix with Atwe AI' toolbar + message translate/transcribe.	index.html acChatAi, acSelAiAct	Missing: summoning the AI as a conversational participant in-thread, and image generation.	Med
BUSINESS PROFILE & CATALOG					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Business profile Name, description, hours, address, category, logo.	● COMPLETE	Business accounts: hours with open-now badge, categories, headline/bio, location, CTA pill.	server.js business_hours	—	—
Product catalog Showcase products with photos/prices.	● COMPLETE	Storefront with variants, galleries, sections, bundles; no item cap.	server.js products	—	—
Cart & in-chat ordering Customers order catalog items in-chat.	● COMPLETE	Cart per seller, product share cards in DMs, offers, invoices, order meta-cards, in-chat checkout entry.	server.js /api/atchat/share/product	—	—
Labels Tag/organize conversations.	● COMPLETE	Chat labels with colors + filter bar + per-chat assign.	server.js chat_labels	—	—
Broadcast lists One message to up to 256 contacts.	● COMPLETE	Broadcast lists (≤256) fanning out as individual DMs.	server.js broadcast_lists	Exact parity, same cap.	—
Green tick (official business) Verified business badge.	● COMPLETE	Business verification request → admin approve → badge.	server.js business_verify_status	—	—
Interactive buttons & list messages Reply/CTA buttons and list pickers in messages.	● DIFFERENT	Rich server-built interactive meta-cards throughout Beam (Pay, RSVP, Accept offer, Book, Complete checkout...).	index.html acMetaCard	Buttons are platform actions; businesses can't compose custom button/list messages. Ties to the Flows row below.	Low
AUTOMATION & COMMERCE					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Quick replies Saved responses.	● COMPLETE	quick_replies with shortcuts + composer tile.	server.js /api/quick-replies	—	—
Chatbot / flows Guided multi-step conversational flows.	● MISSING Large	Greeting/away auto-messages exist; no multi-step flow builder.	—	Roadmap: part of the AI receptionist program (see the flagship row below).	Med
Native payments In-chat payments.	● COMPLETE	Wallet send/request in chat, split bills, invoices, gift cards — full in-chat money layer.	server.js wallet routes	Ahead of WhatsApp's region-limited rollout (PDF flags US timing as unclear).	—
Click-to-chat & QR entry points Links/QR that open a chat.	● COMPLETE	Profile QR codes + scanner, ?u= deep links, Message CTA on profiles, OG link previews.	server.js /api/me/qr	—	—
Agent assignment & team inbox Route conversations to agents; shared inbox.	● MISSING Large	business_team exists with roles/permissions (orders, Q&A, reviews, jobs) — but Beam DMs are owner-only.	server.js business_team	Extend team permissions to a shared inbox with assignment. One of the clearest business asks.	High
Meta Business Agent (24/7 AI) AI agent answering customers, human handoff.	● PARTIAL Large	Greeting + away auto-messages (hours-aware schedule).	server.js maybeAutoReply	Missing: an AI that actually answers from the business's data with handoff — the single highest-leverage Atwe AI gap (pairs with rows in Section 12).	High
Status & channel ads / paid channels Ads in Status; promoted/paid channels.	● MISSING Medium	Ads exist in the feed; none in stories/channels.	—	—	Low
Greeting & away messages Auto-messages for first contact / off-hours.	● COMPLETE	Both, with 14-day/12-hour cooldowns and an 'outside business hours' schedule mode.	server.js auto_reply_log	—	—
WhatsApp Flows (rich in-chat forms) Structured forms/mini-flows in chat.	● PARTIAL Medium	Group-cloud forms exist (reusable fields + dated entries) for internal teams.	server.js group_cloud_kind form	Missing: customer-facing in-chat forms a business can send.	Med
Message templates (pre-approved) Approval-gated outbound templates.	● N/A	Template pre-approval is a WhatsApp-API compliance artifact; Atwe's own rails don't need it — broadcast lists + quick replies + anti-spam cover the intent.	—	—	—

Automation & Commerce					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
CRM / e-commerce integrations Shopify/HubSpot/Salesforce connectors.	● N/A	Atwe is itself the commerce + messaging layer; external connectors belong to a later integrations phase.	—	—	—
Conversation analytics Delivery/read rates, response times.	● MISSING Medium	Cart-recovery counters exist; no business-messaging analytics.	—	Response-time + volume dashboard from existing at_messages data.	Med
BSUID identity handling Durable customer identifier.	● N/A	WhatsApp-platform identity mechanics; Atwe has native stable account IDs.	—	—	—

4

Telegram (+ Premium, Bots)

Maps to Atwe: **Beam** · 32 features audited

Messaging & Broadcast					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Cloud chats & sync Cloud-stored messages, synced across devices.	● COMPLETE	Server-side history + multi-device sessions + SSE resync.	server.js at_messages	—	—
Groups up to 200,000 Very large groups with admin tools.	● DIFFERENT	No hard member cap in the schema; multi-admin tools exist. Fan-out is built for business-scale groups, not 200k crowds.	server.js at_group_members	Channels cover the broadcast use-case; genuine 200k chat would need infra work (Architecture).	—
Voice & video calls + video chats Calls, group video, live streams.	● COMPLETE	1:1 + group calls, call links, Go Live streams, Spaces.	—	—	—
Large file sharing Up to 2–4GB files.	● PARTIAL Medium	File messages exist (any type, original filename).	server.js media_kind_file	Size-capped at megabytes (base64-in-DB). Object storage unlocks big files (Architecture #1).	Med
Polls, quizzes, reactions Interactive polls/quizzes; custom reactions.	● PARTIAL Small	Polls + reactions ✓ (skill-assessment quizzes exist in the profile world).	—	Missing: quiz mode (right answers + stats) in chats; custom emoji reactions.	Low
Scheduled & silent messages Schedule sends; send without notification.	● PARTIAL Small	Scheduled messages ✓ (DM + group, flusher-delivered).	server.js scheduled_messages	Missing: silent send (no-notification delivery). Small flag through the send path.	Low
Stories Ephemeral stories for users/channels/businesses.	● COMPLETE	Full story system (see WhatsApp Status row).	—	—	—
Secret chats (E2EE) Opt-in E2EE 1:1 chats.	● DIFFERENT	Same posture as the WhatsApp E2EE row: transit encryption + honest notice; no E2EE mode.	—	An opt-in 'secret chat' (no server history) is the credible middle path if demanded.	Med
Channels (unlimited subscribers) One-to-many broadcast, 100% reach.	● COMPLETE	Broadcast channels; no algorithmic filtering of channel posts.	—	—	—
Folders Organize chats into custom folders.	● COMPLETE	Chat labels double as folders with a filter chip bar.	server.js chat_labels	—	—
Voice-to-text transcription Transcribe voice/video messages.	● COMPLETE	STT module + cached transcripts + automatic captions on every voice bubble (both sides).	stt.js, transcript_columns	Free (Telegram paywalls it).	—
Saved Messages / personal cloud Personal space for notes and files.	● COMPLETE	Message-yourself self-chat + starred-messages aggregate view.	server.js /api/atchat/starred	—	—
Message editing, pinning & threads Edit, pin, topic threads in groups.	● PARTIAL Medium	Edit + pin ✓ everywhere; DM side-threads ✓ (email-style multiple conversations per person).	server.js dm_threads	Missing: topic threads INSIDE groups (Telegram/Discord/Slack pattern) — recurring theme, see Beam gaps.	Med
Last-seen / privacy granularity Fine-grained who-can-see controls.	● COMPLETE	Presence visibility everyone/connections/nobody with WhatsApp-style reciprocity; read-receipt toggle; profile-view privacy.	server.js presence_visibility	—	—

Bots, Automation & Mini Apps					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Bot API Third-party bots with buttons/payments.	● MISSING Large	No external bot platform.	—	—	Low
Mini apps / web apps Full HTML/JS apps embedded in chat.	● MISSING Large	—	—	—	Low
Guest AI bots / bot-to-bot Tag AI bots into chats; chain bots.	● MISSING Large	—	—	Covered strategically by 'summon Atwe AI in-thread' (WhatsApp Meta-AI row).	Low
Inline bots Invoke a bot in any chat to fetch content.	● MISSING Large	—	—	—	Low
Chat automation / profile bots (AI receptionist) Bot auto-replies on your behalf.	● PARTIAL Large	Greeting/away auto-messages.	server.js maybeAutoReply	Same flagship gap as WhatsApp's Business Agent — counted once in the roadmap.	High

BOTS, AUTOMATION & MINI APPS

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Location-based mini apps Apps using device location.	N/A	Depends on the mini-app platform (skipped).	—	—	—

BUSINESS TOOLS

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Business profile Hours, location, greeting, quick replies.	COMPLETE	All present.	—	—	—
Chatbot integration Attach a chatbot to a business account.	MISSING Large	—	—	Same receptionist program.	Med
Chat tags / labels Tag business conversations.	COMPLETE	Chat labels.	—	—	—
Quick replies & greetings Saved answers; auto first message.	COMPLETE	Both.	—	—	—
Away messages & opening hours Auto-responses outside hours, visible schedule.	COMPLETE	Away schedule 'outside business hours' evaluates live against profile hours; hours render with an open-now badge.	server.js businessOpenNow	—	—

MONETIZATION & PAYMENTS

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Telegram Stars (in-app currency) Virtual currency for digital goods/tips.	DIFFERENT	Atwe uses a real-money wallet (balance, ledger, payouts) instead of a token currency.	server.js wallet_tx	Better fit for business commerce; avoids app-store token gymnastics on web.	—
Native payments API Cards, Apple/Google Pay via providers.	COMPLETE	Stripe Checkout across every paid surface + wallet balance rails.	billing.js	Apple Pay via Stripe is a small enablement worth doing with the iOS app.	—
Suggested / paid posts Channel owners accept paid sponsored posts.	DIFFERENT	Self-serve promoted posts + Atwe Ads (review queue) exist platform-wide.	server.js ad_campaigns	No owner-approved 'post in my channel for \$X' marketplace.	Low
Gifts & collectible gifts Digital gifts incl. tradeable collectibles.	DIFFERENT	Gift cards (real money, claimable, DM-delivered) exist.	server.js gift_cards	No collectible/cosmetic gifts — consumer-social mechanic, weak fit.	Low
Toncoin payments Native crypto payments.	N/A	Crypto is out of scope by design.	—	—	—
Paid subscriptions & content Subscription tiers; pay-to-unlock media.	COMPLETE	Creator sub tiers + PPV post unlocks + paid newsletters + paid courses.	server.js creator_tiers, post_unlocks	—	—
Ad revenue sharing Share of channel ad revenue.	MISSING Large	—	—	—	Low

Shopify

Maps to Atwe: [Engine](#) / [Profile](#) · 44 features audited

STOREFRONT & CATALOG

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Online store builder Themes, pages, customizable storefront.	PARTIAL Medium	Every business gets a real storefront (header, sections/menu categories, bundles row, grouped grid) with zero setup.	index.html acOpenStorefront	Missing: theme/page customization. Atwe's bet is 'instant storefront' over 'store builder' — reasonable, but a hero-banner/accent option would help brands.	Low
Collections Group products into browsable collections.	COMPLETE	Catalog categories / menu sections group the grid (restaurant menus, retail collections).	server.js products.category	—	—
B2B catalogs & volume pricing Company profiles, wholesale pricing.	MISSING Medium	—	—	Wholesale tiers (per-buyer pricing, minimums) are a strong future fit for a business-to-business network.	Med
Native A/B testing Test storefront/checkout variants.	MISSING Large	—	—	—	Low
AI product-image tools Background removal, image enhancement.	MISSING Medium	—	—	Strong candidate for the AI roadmap alongside photo-to-listing.	Med
Product & inventory management Products, variants, vendors, stock.	COMPLETE	Variants (price/stock each, oversell-safe row-locked decrements), stock with restore, sold-out states, restock alerts.	server.js cleanVariants, applyStock	No vendor field / multi-location inventory.	—
Storefront search Typo-tolerant on-site search.	PARTIAL Small	Marketplace search: full-text Best Match ranking + filters/sorts.	server.js /api/marketplace	Missing: a search box inside a single store; no typo tolerance (needs pg_trgm).	Low

STOREFRONT & CATALOG					
FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
B2B net terms & automated invoicing Payment terms, auto-invoicing, vaulted cards.	● PARTIAL Medium	Invoices with due dates + overdue state exist; quotes convert to invoices.	server.js invoices	Missing: net-terms automation and vaulted-card charging.	Low
Buy Buttons Embed products on external sites.	● DIFFERENT	Payment links sell anywhere via a shareable link; OG cards unfurl them nicely.	server.js payment_links	No embeddable widget — link-first covers most of the need.	Low
CHECKOUT & PAYMENTS					
FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Shopify Payments Built-in card processing with fraud analysis.	● COMPLETE	Stripe + wallet rails with a serious fraud stack: velocity caps, wallet freeze, idempotency, claim-first transactions, webhook dedup.	billing.js, walletVelocityCheck	—	—
Local & alternative payment methods Region-specific methods and wallets.	● PARTIAL Small	Stripe Checkout provides cards + its wallet set.	—	Missing: Apple Pay/Google Pay explicitly enabled — near-free via Stripe and high-impact for the iOS app.	Med
Checkout Components (Plus) Composable custom checkout.	● N/A	Platform-internal checkout customization for huge merchants; Atwe owns one checkout.	—	—	—
Delivery-promise dates at checkout Estimated arrival from carrier data.	● MISSING Medium	Shipping options show speed labels (days) when rates are configured.	shiptax.js	True delivery-date promises need carrier ETA APIs.	Low
Payment links Sell via a shareable checkout link.	● COMPLETE	payment_links: fixed or open amount, active toggle, public preview, wallet pay, deep link.	server.js /api/paylink	—	—
Shop Pay Accelerated checkout & wallet.	● DIFFERENT	Wallet balance = one-tap in-network checkout (+ gift-card split tender, escrow option).	server.js payOrderFromSources	In-network only by design; no cross-site wallet ambition.	—
Redesigned checkout & Functions Customizable checkout logic.	● N/A	Merchant-scriptable checkout is a platform feature Atwe doesn't need — one owned checkout.	—	—	—
Gift cards & invoicing Sell gift cards; send invoices.	● COMPLETE	Gift cards (separate balance, claim, split tender, admin program with freeze + liability reconciliation) + invoices (+ quotes).	server.js gift_cards, invoices	—	—
Ship + pickup in one cart Mixed fulfillment in a single order.	● PARTIAL Small	Local pickup exists per order when every physical item offers it.	server.js resolveShipping pickup	Missing: mixed ship+pickup lines in one order.	Low
RETAIL / POS					
FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Shopify POS In-person selling synced with online.	● MISSING Large	—	—	—	Low
Omnichannel inventory Unified stock across online and in-person.	● N/A	No POS, so nothing to unify yet.	—	—	—
Same-day local delivery (Uber Direct) Hyperlocal delivery fulfillment.	● MISSING Large	—	—	—	Low
POS hardware & card readers Terminals and readers.	● N/A	Out of scope with POS skipped.	—	—	—
Subscriptions & multi-location pickup in POS Sell subscriptions in-store.	● N/A	POS-dependent.	—	—	—
MARKETING & SALES CHANNELS					
FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Email & marketing automation Built-in campaigns and automations.	● PARTIAL Large	Transactional email (orders, shipping, login alerts), cart-recovery nudges, re-engagement push.	mailer.js, flushCartRecovery	Missing: a campaign builder (segments, sends, stats) for businesses.	Med
Multichannel selling Publish to Google/Meta/YouTube/etc.	● N/A	Atwe IS the sales channel; syndication out is a later integrations phase.	—	—	—
Abandoned-cart recovery Automated reminders to recover carts.	● COMPLETE	Beam cart-recovery: delay setting, weekly cap, per-cart-once, DND/block/mute aware, recovered-revenue tracking.	server.js cart_recovery_log	Arguably better-behaved than most (strict anti-spam).	—
Shop Campaigns across AI/ad channels Native ad network on external AI surfaces.	● MISSING Large	—	—	—	Low
Shopify Collective Sell other brands' products with commission.	● DIFFERENT	Affiliate program: per-product referral links, clicks, commission on sale (10%), correct source-of-funds payout.	server.js affiliate_links	Link-based promotion rather than retailer-listed supplier catalogs.	Low

MARKETING & SALES CHANNELS					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Discounts & bundles Codes, automatic/stacked discounts, bundles.	● COMPLETE	Coupons (percent/fixed, min order, caps, single-use-per-buyer race-safe) + fixed product bundles with savings preview.	server.js coupons, bundles	No automatic (no-code) or stacked discounts.	—
Shopify Messaging (WhatsApp + SMS) WhatsApp/SMS as marketing channels.	● DIFFERENT	Beam is the native message channel (cart recovery already uses it); no SMS.	—	SMS becomes interesting only for off-platform reach.	Low
Campaign attribution Attribute sales to campaigns.	● PARTIAL Small	Affiliate sales, ad clicks/spend, coupon usage each tracked.	—	Missing: one attribution report joining them.	Low
Shopify Inbox (chat selling + AI) Sell and support via chat with AI assist.	● COMPLETE	In-chat product cards + checkout, AI shopping concierge, AI customer-service answer drafts, auto-messages.	server.js /api/ai/shop, /api/ai/cs-answer	—	—

ANALYTICS & FINANCE					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Sales & customer dashboards Sales, behavior, finance reports.	● COMPLETE	Shop analytics (revenue, units, to-ship, top products, trend), business analytics, owner dashboard with needs-attention.	server.js /api/shop/analytics, /api/dashboard	—	—
Custom & advanced reports Deeper custom reporting.	● MISSING Medium	Dashboards are fixed-format.	—	CSV exports exist in a few places (forms/expenses); a report builder is later-stage.	Low
Capital / lending Merchant cash advances.	● MISSING Large	—	—	—	Low
Marketing data in analytics Spend/ROAS alongside sales.	● PARTIAL Medium	Ad campaign spend/click trends exist per campaign.	server.js acProductAdsSummary	Missing: ROAS joining ad spend to attributed sales.	Low
Multi-store / heatmap analytics Cross-store dashboards, heatmaps.	● MISSING Large	—	—	—	Low
Shopify Balance & Credit Business bank-style account + credit card.	● PARTIAL Large	Wallet balance IS the money account (ledger, pots, payouts to bank via Stripe Connect); Atwe Card exists as a waitlist product.	server.js wallet, card_waitlist	Missing: the live card program (issuing partner + KYC) and any credit product.	Med

AI / AGENTIC COMMERCE					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Sidekick (admin AI) AI assistant that runs the store; proactive insights.	● PARTIAL Large	AI writes product copy, drafts CS answers, powers shopping search; dashboards exist separately.	server.js ai routes	Missing: a unified 'run my store' AI with proactive insights — the business half of the flagship AI program.	High
Agentic storefronts / Catalog (UCP) Sell inside external AI channels.	● MISSING Large	—	—	Strategic: exposing Atwe catalogs to AI shopping surfaces later.	Low
Agentic Plan for non-merchants Catalog sync to AI surfaces.	● N/A	Shopify-specific packaging of the above.	—	—	—
AI store analysis AI-simulated shoppers flag conversion issues.	● MISSING Medium	—	—	—	Low
Campaign Autopilot AI-run marketing campaigns.	● MISSING Large	Sponsored listings have budget pacing but no AI optimization.	—	—	Low
Retail AI Sales Associate AI on POS for staff.	● N/A	POS-dependent.	—	—	—

TikTok & TikTok Shop

Maps to Atwe: Home / Engine · 32 features audited

CONTENT & FEED					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
For You feed (discovery) Algorithmic feed reaching non-followers.	● COMPLETE	Discover shorts (out-of-network by design) + For You exploration slots for fresh/low-engagement posts.	server.js /api/feedposts/discover	—	—
Photo mode & carousels Multi-image posts.	● COMPLETE	Multi-image posts + swipe carousels in the immersive viewer.	—	—	—
Effects, filters & templates Creative effects and AI creative tools.	● MISSING Large	—	—	—	Low
LIVE streaming Real-time broadcast with interaction.	● COMPLETE	Go Live + live shopping pin + group live.	—	—	—
Longer video & horizontal video Multi-minute and landscape video.	● PARTIAL Medium	Video posts exist; portrait/landscape both render.	—	Length/size capped ~3.5MB — object storage unlocks this (Architecture #1).	Med

Content & Feed					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Saved / favorites & playlists Bookmark videos; organize into playlists.	PARTIAL Small	Feed-post saves + bookmarks exist.	server.js feed_post_saves	Missing: playlists (ordered collections of videos).	Low
Short video creation Record/upload with editing tools.	PARTIAL Medium	Upload + immersive publishing works.	—	No in-app trim/edit. On iOS, native camera + Photos editing narrows this a lot.	Low
Sounds / audio library Attach trending audio.	N/A	Deliberately skipped — music licensing. Videos/stories carry their own audio.	—	—	—
Duet / Stitch Respond to or remix others' videos.	MISSING Large	Quote posts exist for text; no video remix.	—	—	Low
Stories & TikTok Notes Ephemeral stories + text posts.	COMPLETE	Stories + text posts both native.	—	—	—
AI-label / disclosure for AI content Label AI-generated content.	MISSING Small	—	—	A self-declare 'AI-generated' toggle + label is small and buys trust (pairs with Section 12).	Med
Creator Tools & Monetization					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Creator dashboard & analytics Views, engagement, audience.	COMPLETE	Per-post analytics + profile/business analytics + Ads Manager.	—	—	—
Gifts & LIVE monetization Virtual gifts during streams.	PARTIAL Medium	Tips exist as one-off payments.	server.js tips	Missing: in-stream live gifting UX.	Low
TikTok One / brand campaigns Match creators with brand deals.	MISSING Large	—	—	Related to 'Find Creators' below — one creator-marketplace concept.	Low
Creator rewards / fund Payouts for qualifying content.	MISSING Large	—	—	—	Low
Subscriptions Paid creator subscriptions.	COMPLETE	Multi-tier creator subs.	—	—	—
Series (paid content) Sell premium video bundles behind a paywall.	DIFFERENT	Courses (structured paid video/lessons) + PPV posts cover paid content bundles.	server.js courses, post_unlocks	—	—
TikTok Shop — Selling Surfaces					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Shoppable video Tag products in feed videos.	COMPLETE	Product tags (≤5, own active products) on posts, reels AND stories → quick-buy sheet → real checkout with escrow.	server.js content_product_tags	Includes tap analytics for the seller.	—
Showcase / Shop tab Storefront on profile + Shop tab.	COMPLETE	Business-tab shop + full storefront + Showcase portfolio.	—	—	—
Product catalog & listings Products with media and descriptions.	COMPLETE	Full catalog with galleries, variants, specs/amenities.	—	—	—
LIVE shopping Sell in real time during streams.	COMPLETE	Pin-a-product to Go Live; viewers get a live buy card via SSE.	server.js /api/live/pin	—	—
Native in-app checkout Buy without leaving the app.	COMPLETE	Wallet/escrow/Stripe checkout end-to-end in-app.	—	—	—
Mall / Shop centre & recommendations Shopping tab with personalized discovery.	COMPLETE	Marketplace browse with Best Match ranking + per-viewer personalization (industry, repeat-purchase, wishlist).	server.js /api/marketplace	—	—
TikTok Shop — Seller & Affiliate Ops					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Seller Center Dashboard for catalog/orders/analytics.	COMPLETE	Manage store hub + owner dashboard + sales analytics.	index.html acOpenStoreManag e	—	—
Find Creators / matchmaking Recruit creators by category/followers/sales.	MISSING Medium	Affiliate links exist; no creator-discovery marketplace for sellers.	—	Natural extension of the affiliate program.	Med
Auto-Post Auto-generate shoppable videos from listings.	MISSING Medium	—	—	AI-generated listing media is an AI-roadmap candidate.	Low
Fulfillment & returns Orders, shipping, returns handling.	COMPLETE	Full pipeline: labels (Shippo), tracking links, delivered webhook, returns/RMA with refunds + return labels.	server.js order_returns, shipLabels.js	—	—
Shop ads & product cards Shopping ad formats driving to checkout.	COMPLETE	Sponsored listings: real second-price CPC auction, budgets/pacing, self-serve manager, admin oversight.	server.js product_ads	—	—

FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Affiliate program Commission-based creator partnerships.	● COMPLETE	Per-product links, click tracking, 10% commission, correct payout sourcing, dashboard.	server.js affiliate_links	—	—
Sample management Send product samples to creators.	● MISSING Medium	—	—	—	Low
GMV Max / Spark Ads Amplify top content as ads.	● DIFFERENT	Promote-a-post amplifies organic posts; sponsored listings amplify products.	—	—	—
Fulfilled by TikTok / warehousing Platform-operated storage/shipping.	● N/A	Atwe doesn't operate logistics.	—	—	—

LISTINGS & SELLING

FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Fixed-price & auction listings Buy-It-Now and timed auctions.	● PARTIAL Medium	Fixed-price listings + Make-an-Offer negotiation cover most of the intent.	server.js products, offers	Missing: timed auctions — already a documented 'deferred phase 2' decision in the codebase.	Low
Bulk listing tools Create/edit many listings at once.	● MISSING Medium	Listings are managed one at a time.	—	CSV import / bulk edit for catalog-heavy sellers.	Low
Promoted listings Pay to boost visibility.	● COMPLETE	Sponsored listings CPC auction with suggested bids and analytics.	server.js product_ads	—	—
Seller Hub Central dashboard for listings/orders/performance.	● COMPLETE	Manage store + owner dashboard + sales analytics.	—	—	—
Offers to buyers / watchers Send targeted discounts to interested buyers.	● DIFFERENT	Wishlist watchers are auto-notified on price drops and restocks.	server.js notifyPriceDrop	Automatic rather than seller-initiated; a 'send offer to watchers' action would be a small addition.	Low
Listing catalog / item specifics Structured product data and categories.	● COMPLETE	Specs (key-value), amenities, categories, variants.	server.js cleanSpecs, cleanAmenities	—	—
AI-assisted listing (photo-to-listing) Photo → AI drafts title/description/price.	● PARTIAL Medium	AI drafts product descriptions from name+kind today.	server.js acProdDescAi	Missing: the photo-first flow (vision → full draft listing). High-value AI roadmap item.	Med
Best Offer / negotiation Buyers submit offers; sellers counter.	● COMPLETE	Offers with accept/counter/decline, turn tracking, DM cards, checkout at the agreed price.	server.js offers	—	—
eBay Stores (subscription) Branded storefront with tiers.	● DIFFERENT	Storefronts are free with business accounts — no paid store tiers.	—	Deliberate: lower the barrier for businesses.	—

TRUST, REVIEWS & FULFILLMENT

FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Ratings & feedback Buyer/seller feedback and ratings.	● COMPLETE	Product reviews (verified buyers, media), business reviews with owner response, buyer ratings (two-way), unified trust score with tiers.	server.js product_reviews, buyer_reviews, userTrustScore	Deeper than eBay's model.	—
Managed payments & payouts Integrated payments to bank.	● COMPLETE	Wallet + Stripe Connect Express payouts with onboarding + webhook status.	billing.js createPayout	—	—
Authentication guarantee Third-party authentication for high-value items.	● MISSING Large	—	—	—	Low
Buyer & seller protection Money-back guarantee, dispute resolution.	● COMPLETE	Escrow (hold → confirm/auto-release), disputes with admin resolution + 48h SLA, refund center, returns.	server.js escrow, refund_requests	—	—
Shipping labels & tracking Discounted labels and tracking.	● COMPLETE	Shippo label purchase (multi-carrier rates), tracking links, delivered webhook, return labels.	shiplabels.js	—	—
Global shipping program Simplified international selling.	● MISSING Large	—	—	—	Low

SERVERS, CHANNELS & ROLES

FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Servers (communities) Standalone community spaces with channels.	● COMPLETE	Communities: umbrella + announcement channel + sub-groups + discovery.	server.js communities	—	—
Threads & forum channels Branch conversations; forum-style channels.	● PARTIAL Medium	Message replies + DM side-threads exist.	server.js dm_threads, reply_to	Missing: topic threads inside groups + forum-style channels (the recurring Beam theme).	Med

Servers, Channels & Roles					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Categories & channel organization Group channels into categories.	DIFFERENT	Communities group sub-groups under one umbrella.	—	Serves the same organizing job at Atwe's scale.	—
Spoiler channels Whole channels hidden behind spoilers.	MISSING Small	—	—	—	Low
Text & voice channels Persistent text + always-on voice rooms.	PARTIAL Medium	Text channels ✓.	—	Missing: always-on drop-in voice rooms (calls are session-based). Group calls + Spaces cover scheduled needs.	Low
Roles & permissions Granular role-based access.	PARTIAL Medium	Group roles (creator/admin/member), channel post-restriction, business-team permissions, staff RBAC.	server.js isGroupAdmin, business_team	Missing: custom roles + per-channel permission matrices.	Med
Channel & DM pinning Pin chats to the top.	COMPLETE	Per-thread pin in the chat list.	index.html acPinKey	—	—
Server tags & per-server profiles Server tag + distinct identity per server.	MISSING Medium	—	—	—	Low
Voice, Video & Live					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Voice channels Drop-in group voice.	PARTIAL Medium	Group voice calls + audio Spaces.	—	Same gap as 'always-on voice rooms' above — counted once.	Low
Stage channels Moderated audio events.	COMPLETE	Spaces: stage vs audience, raise-hand, promote/demote.	server.js /api/live stage	—	—
Clips Capture short clips of voice/stream moments.	MISSING Medium	—	—	—	Low
Video calls & screen share Group video and screen sharing.	COMPLETE	Group video + screen share (getDisplayMedia — verified in code).	index.html getDisplayMedia	—	—
Soundboard & effects In-call sound effects.	MISSING Small	—	—	—	Low
Activities (embedded apps/games) Shared apps/games inside voice.	MISSING Large	—	—	—	Low
Community Management & Bots					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Bots & integrations Automated moderation/roles/utilities.	MISSING Large	—	—	Same platform decision as Telegram's Bot API (counted once in the roadmap).	Low
Onboarding & rules screening Member onboarding and rule gates.	MISSING Small	App-level onboarding exists; groups have no rules gate.	—	A 'agree to rules before posting' toggle per group is small.	Low
Events & scheduled events Server event calendar.	COMPLETE	Events product (RSVP, tickets, capacity, ICS, agenda).	server.js events	—	—
Server Insights (analytics) Member activity/retention analytics for owners.	MISSING Medium	—	—	Per-community owner analytics — reuse the analytics patterns that exist elsewhere.	Med
AutoMod (incl. AI) Keyword/spam auto-moderation with AI.	COMPLETE	Heuristic + AI post moderation into the reports queue + admin AI content scans (posts, groups, listings, profiles, ads).	server.js moderatePost, moderation_scans	Platform-level; per-group owner-defined rules would be the extension.	—
Server discovery Public community directory.	COMPLETE	Communities discover scope + search.	—	—	—
Conversation summaries (AI) AI recap of busy channels.	COMPLETE	'Summarize chat' works in DMs and groups from the composer AI.	index.html acChatAi	—	—
Monetization & Premium					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Nitro (subscription) Platform perks subscription.	DIFFERENT	Atwe Pro exists (AI token depth today; perks TBD).	users.plan	Pro's value ladder is thin — a deliberate pricing decision to make post-launch.	Med
Server Shop (digital products & roles) Sell files/roles via a channel storefront.	MISSING Medium	Digital products with auto-delivery exist on storefronts; nothing community-scoped.	—	—	Low
Orbs & Quests Reward currency and ad-linked quests.	DIFFERENT	Loyalty points (~1% back, tiers, redeem to wallet) exist.	server.js loyalty_tx	No ad-linked quests — fine.	—

Monetization & Premium					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Server subscriptions / shop Paid member tiers per community.	● MISSING Medium	Creator subs are per-person, not per-community.	—	Paid community membership is a credible business feature (mastermind groups, trade associations).	Med
Server boosts Members boost a server for perks.	● MISSING Medium	—	—	—	Low

Slack

Maps to Atwe: Beam · 27 features audited

Messaging & Channels					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Channels (public/private) Topic/project channels.	● COMPLETE	Groups + broadcast channels + communities.	—	—	—
DMs & group DMs Direct and small-group messaging.	● COMPLETE	DMs + named groups.	—	—	—
Search across everything Search messages, files, canvases.	● PARTIAL Small	Message-content search (visibility-correct, scoped or global) + in-chat search + global entity search.	server.js /api/atchat/messages/search	Missing: group-cloud files/docs indexed into search.	Low
Scheduled send & forward-later Schedule messages and forwards.	● PARTIAL Small	Scheduled messages ✓.	—	Missing: scheduling a forward specifically (niche).	Low
Threads Threaded replies keeping channels clean.	● PARTIAL Medium	Reply-with-quote exists on every message.	—	Missing: collapsed thread views in groups (the recurring Beam theme — one build covers Slack/Discord/Teams/Telegram rows).	Med
Slack Connect Shared channels with external orgs.	● DIFFERENT	Atwe is one open network — any business ↔ business chat or shared group needs no federation.	—	Structural advantage over walled workspaces.	—
Notification controls Per-channel notification preferences.	● COMPLETE	Per-chat mute (with until/snooze), category prefs, quality filters, quiet hours.	server.js chat_mute_until , notif_prefs	—	—

Collaboration Surfaces					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Canvas Rich collaborative docs bound to channels.	● DIFFERENT	Group Cloud notes = shared docs per group (last-write-wins) alongside 6 other tool kinds.	server.js group_cloud	No rich block editor or live co-editing; fine for launch, watch demand.	Low
Lists Track/approve/complete tasks.	● COMPLETE	Group Cloud checklists: assignable tasks, progress, AI-generated from a prompt or from chat.	server.js chat-checklist	—	—
File sharing & clips Files; short audio/video clips with transcripts.	● COMPLETE	File/video messages + voice notes with automatic transcripts; Group Cloud file drive.	—	—	—
Bookmarks & pins Pin messages, bookmark links per channel.	● COMPLETE	Star (bookmark) + pin, both DM and group, with aggregate starred view.	—	—	—
Split view Pin a thread side-by-side.	● DIFFERENT	Desktop Beam is a two-pane master/detail already.	index.html body.beam2	No arbitrary side-by-side pinning.	—
Customer contacts / lightweight CRM Track customers and deals in-app.	● PARTIAL Large	Contacts with saved fields + auto-fill, chat labels ('new/pending/paid' pattern), reverse contacts.	server.js contacts	Missing: deals/pipelines. The 'Engine CRM' theme — one of the biggest coherent post-launch opportunities.	Med

Voice & Video					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Huddles Lightweight drop-in audio/video with screen share.	● COMPLETE	Calls + screen share from any chat.	—	—	—
Auto meeting notes AI notes/action items from calls.	● MISSING Large	Voice-note transcription exists; calls are not recorded/transcribed.	—	Needs call recording + STT + summarize — a coherent 'meeting intelligence' build.	Med
System audio share Share device audio during screen share.	● MISSING Small	—	—	—	Low

Automation & AI					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Workflow Builder No-code automations (triggers → steps).	● MISSING Large	—	—	A big, differentiating build for business ops; candidates: new-order → notify team, new-applicant → add to checklist.	Med

Automation & AI					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Slackbot / AI assistant Personal AI agent: search, drafting, memory.	● COMPLETE	Atwe AI world + woven-in assists + agent actions.	—	Memory + data-search are the upgrades (Section 12).	—
AI recap & translations Channel recaps + one-click translation.	● COMPLETE	'Catch me up' digest + summarize-chat + inline post/message translation.	server.js /api/ai/digest	—	—
Inline AI charts Turn numbers in a message into a chart.	● MISSING Medium	—	—	—	Low
Profile & file summaries AI summary before you open something.	● MISSING Small	—	—	Small AI affordances once data-RAG exists.	Low
Scheduled Slackbot tasks & actions Recurring AI tasks with approval.	● MISSING Medium	—	—	'Every Monday, draft my week's posts' — pairs with agent upgrades.	Med
CRM in Slack Create/update CRM records in chat.	● MISSING Large	—	—	Depends on the Engine CRM theme.	Low
AI-suggested sidebar sections AI files a new channel for you.	● MISSING Small	—	—	—	Low
Agents (Agentforce / custom / MCP) Custom AI agents acting in channels.	● PARTIAL Large	One built-in agent with 4 confirm-gated tools (event, invoice, post, reply).	server.js AGENT_TOOLS	Missing: more tools + custom/third-party agents. Tool expansion is the near-term path (Section 12).	Med
Skills (reusable AI) Shareable AI skills teammates invoke.	● MISSING Medium	—	—	—	Low
App marketplace / integrations Third-party app connectors.	● MISSING Large	—	—	—	Low

10

Microsoft Teams

Maps to Atwe: **Beam** · 23 features audited

Chat & Teams					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Teams & channels Org units with channels.	● COMPLETE	Groups/channels/communities + business team seats.	—	—	—
@mentions & threaded replies Mentions and per-message replies.	● COMPLETE	Group @mention notifications (verified in code) + reply-to on every message.	server.js notify 'mention'	—	—
External / guest access Chat with people outside the org.	● DIFFERENT	One open network — externality doesn't exist as a boundary.	—	—	—
Threaded channel conversations Refreshed threading model.	● PARTIAL Medium	Same as the Slack/Discord threads rows — replies exist, no thread panes.	—	One build resolves all four platforms' thread rows.	Med
1:1 & group chat Persistent chat with rich formatting.	● COMPLETE	Full Beam.	—	Rich text formatting in messages is plain (entities only).	—
Presence & status Availability + status messages.	● PARTIAL Small	Online/last-seen presence with privacy granularity.	server.js presence	Missing: custom status text/emoji ('In a meeting') — verified absent.	Low
Saved messages & pin chats Save messages; pin priority chats.	● COMPLETE	Starred messages + pinned chats.	—	—	—

Meetings & Calls					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Video meetings Scheduled meetings, lobby, large capacity.	● PARTIAL Large	Group calls (≤8) + shareable call links + events with ICS.	server.js call_links	Missing: true scheduled-meeting infra (lobby, larger capacity, calendar-native). SFU infra required beyond ~8 (Architecture).	Med
Breakout rooms Split a meeting into rooms.	● MISSING Large	—	—	—	Low
Live captions & translation Real-time captions in calls.	● MISSING Large	—	—	Accessibility-relevant; heavy (streaming STT).	Med
Phone system / PSTN Cloud calling to phone numbers.	● MISSING Large	—	—	—	Low
Screen share & presenter tools Share screen; presenter modes.	● COMPLETE	Screen share ✓ (verified).	index.html getDisplayMedia	No presenter modes (overlay layouts).	—
Recording & transcription Record meetings; auto transcripts.	● MISSING Large	—	—	Part of the 'meeting intelligence' build with auto-notes.	Med

MEETINGS & CALLS					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Webinars & town halls Structured large-audience events.	● PARTIAL Large	Events (tickets, capacity) + Go Live broadcasts cover the informal version.	—	Missing: registration flow + large-audience streaming infra.	Low
Intelligent recap & speaker insights AI meeting timeline: topics, action items.	● MISSING Large	—	—	Follows recording+transcription.	Low

COLLABORATION & APPS					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
File sharing (per channel) Files stored and co-edited per channel.	● COMPLETE	Group Cloud: per-group drive with folders + 7 tool kinds.	server.js group_cloud	—	—
Tabs & app integration Pin apps as tabs in channels.	● MISSING Large	—	—	—	Low
Loop components Live snippets that sync everywhere pasted.	● MISSING Large	—	—	—	Low
Copilot agents / Copilot Studio Build custom AI agents.	● MISSING Large	—	—	Same as Slack custom agents — future platform phase.	Low
Co-authoring Office docs Real-time co-editing of documents.	● PARTIAL Large	Group Cloud sheets/notes are shared and multi-writer (last-write-wins + realtime push).	server.js cloud push	Missing: live cursors/merge (CRDT) — significant infra; demand-driven.	Low
Approvals & Shifts Built-in approvals and staff scheduling.	● PARTIAL Medium	Shifts/rota exists (Group Cloud schedule kind) + rosters.	server.js kind schedule/roster	Missing: an approvals workflow (request → approve trail).	Low
Copilot (AI) AI recap, summaries, drafting.	● COMPLETE	Atwe AI across surfaces.	—	Meeting recap arrives with meeting intelligence.	—
Whiteboard Shared visual canvas in meetings.	● MISSING Large	—	—	—	Low

11

Google Business Profile
 Maps to Atwe: **Engine** · 14 features audited

PROFILE & DISCOVERY					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Business listing Name, category, hours, contact in search.	● COMPLETE	Business directory: search, industry + verified filters, hours, categories, near-me.	server.js /api/businesses /directory	—	—
Photos & videos Business imagery.	● COMPLETE	Banner/avatar/posts/storefront media on the business profile.	—	—	—
Attributes Tags like wheelchair-accessible, women-owned.	● PARTIAL Small	Amenity tags exist on listings and services.	server.js cleanAmenities	Missing: business-level attribute tags surfaced in the directory. Small schema+UI addition.	Low
Social profile links Link social accounts on the listing.	● PARTIAL Small	One website link on the profile.	—	Missing: multiple social links. Trivial addition.	Low
Maps placement Pin and info on a map.	● DIFFERENT	Near-me: haversine distance sort + distance chips, geolocation opt-in — deliberately no map tiles (key-free).	server.js /api/local ? near	A real map view is a natural iOS-app phase-2 feature (native MapKit is free).	Med
Products & services List offerings with prices.	● COMPLETE	Products (storefront) + Services (rate cards, categories) + unified Local hub.	server.js services, /api/local	—	—
Verification Verify listing ownership.	● COMPLETE	Business verification flow + badge.	—	—	—

ENGAGEMENT & REVIEWS					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Reviews & ratings Collect and respond to reviews.	● COMPLETE	Business reviews (1–5★, one per reviewer, owner response) + summary bar.	server.js business_reviews	—	—
Posts / updates Share offers and news on the profile.	● COMPLETE	Posts + profile tabs + promoted posts.	—	—	—
Bookings / appointments Book from the profile.	● COMPLETE	Services + appointments + Calendly-style open slots + deposits held in escrow.	server.js /api/business/:i d/slots	—	—
AI-assisted review replies Suggested drafts for review responses.	● PARTIAL Small	AI CS-answer drafts exist for business Q&A.	server.js /api/ai/cs- answer	Missing: the same button on review responses — a one-day wire-up of existing AI.	Med
Q&A Public questions and answers.	● COMPLETE	Business Q&A (owner answer flagged + sorted first) + product Q&A.	server.js business_questio ns	—	—

ENGAGEMENT & REVIEWS

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Messaging Customers message the business.	● COMPLETE	Beam DMs with auto-messages, contact-privacy.	—	—	—
Call tracking & insights Calls, direction requests, search insights.	● PARTIAL Small	Business analytics: profile views, followers, reach, hiring, shopping tag-taps.	server.js /api/business/analytics	Missing: call/CTA-tap counters (small events to add).	Low

12 Atwe AI — cross-platform assistant benchmark

Maps to Atwe: Atwe AI · 32 features audited

CONVERSATIONAL & KNOWLEDGE

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Natural-language chat Assistant Q&A grounded in your business.	● COMPLETE	Atwe AI world: full chat with images, voice input, history, projects, brand-safe.	server.js /api/chat	—	—
Search across your data Answer from your posts, chats, files, records.	● PARTIAL Large	Digest reads your network's posts; summarize-chat reads the open thread.	server.js /api/ai/digest	Missing: true retrieval over YOUR posts/chats/orders/files ('what did the supplier quote me?'). Flagship gap #2.	High
Persistent memory of your context AI remembers people, projects, preferences.	● MISSING Large	Each conversation stands alone (stored, but not used as memory).	—	A per-user memory profile injected into prompts is a contained build.	Med
Summarize threads / meetings Condense chats, channels, calls.	● PARTIAL Large	Summarize-chat ✓ (DM + group).	—	Missing: call/meeting summaries (needs recording+transcription first).	Med
Explain / translate Explain complex messages; translate.	● COMPLETE	Explain overlay + message/post translate into the reader's language.	server.js /api/explain, translate	—	—
Proactive daily briefing Morning catch-up without being asked.	● PARTIAL Small	'Catch me up' digest exists on demand; re-engagement push exists separately.	—	Missing: scheduled proactive delivery (a flusher + push carrying the digest — infra all exists).	Med

CONTENT GENERATION

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Write & schedule posts Draft and queue feed content.	● COMPLETE	Composer AI + agent schedule_post action with confirm card.	server.js AGENT_TOOLS	—	—
Draft messages / replies Compose DMs, outreach, replies.	● COMPLETE	Chat composer AI (suggest reply, improve, rephrase) + selection toolbar + agent draft_reply.	—	—	—
Edit / enhance product photos Remove backgrounds, restyle images.	● MISSING Medium	No image generation/editing anywhere.	—	Needs an image provider; pairs with photo-to-listing.	Med
Write product descriptions Generate storefront copy.	● COMPLETE	'Write with Atwe AI' in the product form.	server.js acProdDescAi	—	—
Generate images / media Create images for posts/products.	● MISSING Medium	—	—	Same provider dependency.	Med
Photo-to-listing One photo → full draft listing.	● MISSING Medium	Description-from-name exists.	—	Vision → title/copy/category/price draft. High-leverage seller magic; models can do it today.	High

ACTIONS & AGENTIC TASKS

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Find businesses / leads Search and surface prospects.	● PARTIAL Small	AI shopping concierge (products) + AI matchmaker (jobs/workers) exist.	server.js /api/ai/shop, /api/ai/jobmatch	Missing: 'find me 5 packaging suppliers near Boston' over the business directory — small addition to existing retrieval+rank pattern.	Med
Create a storefront Stand up a shop from a prompt.	● MISSING Medium	Agent has no product/storefront tools.	—	Add create_product/update_storefront agent tools with the existing confirm-card pattern. A stated Atwe AI goal.	High
Analyze sales / analytics Interpret dashboards, surface insights.	● MISSING Small	Dashboards exist; AI doesn't read them.	—	Feed shop/business analytics JSON into an AI explain endpoint. A stated Atwe AI goal.	High
Update records (CRM) in chat Create/edit records conversationally.	● MISSING Large	—	—	Depends on Engine CRM.	Low
Auto-reply / receptionist Handle inbound messages automatically.	● PARTIAL Large	Greeting/away auto-messages with schedule + cooldowns.	server.js maybeAutoReply	Missing: AI answering from business data (hours/products/FAQs) with per-business opt-in + handoff. FLAGSHIP GAP #1 — appears across WhatsApp/Telegram/Shopify benchmarks.	High
Run marketing campaigns (autopilot) AI optimizes bids/timing/targeting.	● MISSING Large	Budget pacing exists in the ads auction; no AI optimization.	—	—	Low

ACTIONS & AGENTIC TASKS

FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Recurring scheduled AI tasks AI does a task on a schedule.	● MISSING Medium	Flusher infrastructure exists for many domains; none run AI tasks.	—	'Every Friday, summarize my orders' — pairs with proactive briefing.	Med
Send messages on your behalf Compose and send communications.	● PARTIAL Small	draft_reply produces text to copy.	—	Missing: a confirmed send_message tool (the confirm-card pattern already exists to gate it).	Med
Manage appointments Book, reschedule, confirm.	● PARTIAL Small	create_event agent tool exists.	—	Missing: appointment tools (book/confirm/decline) — routes all exist to call.	Med
Auto-generate storefront/video content Turn listings into shoppable media.	● MISSING Large	—	—	—	Low
Agent workflows / chaining Multi-step automations across tools.	● MISSING Large	Agent executes one confirmed action at a time.	—	Multi-step plans with a single approval summary — natural evolution of the current pattern.	Med
Calendar & email actions Create events, send emails via connected accounts.	● PARTIAL Large	create_event ✓ (Atwe events).	—	Missing: external calendar/email connectors (integrations phase).	Low
Generate purchase orders / restock POs and inventory transfers from stock data.	● MISSING Medium	Stock data + restock alerts exist.	—	—	Low

CONTROLS & TRUST

FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Permission-scoped access AI only sees what the user can see.	● COMPLETE	Every agent action executes through the caller's own authenticated routes — the AI can never exceed the member's permissions.	server.js agent design	Structurally enforced, not policy-enforced. Strong.	—
Admin AI-access controls Restrict which data AI can use.	● PARTIAL Small	Platform-wide AI kill switch (feature flags).	server.js requireFeature('ai')	Missing: granular scoping (per-surface AI controls).	Low
Opt-out / content consent Block AI from acting on specific content.	● N/A	No AI media manipulation exists to opt out of yet.	—	Adopt with image features.	—
Audit logs for AI actions Every AI action tracked and reviewable.	● MISSING Small	Admin actions are audit-logged; member-confirmed AI actions are not tagged as AI-initiated.	—	Tag agent-confirmed actions into platform_events — small and worth doing early.	Med
Preview-before-action Draft/preview + approval before executing.	● COMPLETE	The agent's confirmation-card pattern: server never executes side effects; client confirms then calls the real route.	server.js /api/ai/agent	Matches the best practice the PDF highlights.	—
Human handoff AI → human team member on demand.	● MISSING Small	—	—	Ships as part of the AI receptionist design.	Med
AI-content labeling Disclose AI-generated content.	● MISSING Small	—	—	Self-declare toggle + label (same row as TikTok's).	Med

MESSAGING & CHAT QOL (BEAM)

FEATURE & DESCRIPTION	STATUS	EVIDENCE FOUND	FILES / MODULES	NOTES · GAP · DIFFERENCE	PRIORITY
Message editing & deletion Edit within a window; delete for self/everyone.	● COMPLETE	Edit + delete-for-me/everyone, DM and group.	—	—	—
Pinned messages Pin key messages.	● COMPLETE	Pin + banner + pins endpoint, both scopes.	—	—	—
Reply / quote & forwarding Inline reply, quote, forward.	● COMPLETE	All three with attribution.	—	—	—
Voice notes with transcription Audio messages auto-transcribed.	● COMPLETE	Voice notes + cached transcripts + captions both sides.	stt.js	—	—
Disappearing / self-destruct messages Auto-expiring messages.	● COMPLETE	Timers + view-once.	—	—	—
Reactions & custom reactions Emoji reactions, custom/animated options.	● COMPLETE	Emoji reactions everywhere.	—	No custom/animated emoji uploads (fine).	—
Typing & read receipts Typing indicators; toggleable receipts.	● COMPLETE	Typing + delivered/read ticks + a reciprocal read-receipts toggle.	users.read_receipts	—	—
Mentions & @here/@everyone Mention people; broadcast to a channel.	● PARTIAL Small	Group @mentions notify the named member (verified).	server.js 'mention' notify	Missing: @everyone/@here broadcast ping for group admins.	Low

Messaging & Chat QOL (Beam)					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Scheduled & draft messages Schedule sends; synced drafts.	● PARTIAL Small	Scheduled ✓ server-side; drafts ✓ per conversation.	index.html Drafts	Drafts are device-local (localStorage), not synced across devices.	Low
Notifications, Organization & Discovery					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Granular notification settings Per-chat mute, keyword alerts, quiet hours.	● COMPLETE	Per-chat/thread mute, per-category prefs, quality filters, quiet hours/DND with timezone handling.	server.js notif_prefs, dnd_*	No keyword alerts (watch-words that ping you).	—
Bookmarks / saved & folders Save privately; organize into folders.	● COMPLETE	Bookmarks + folders (posts), stars (messages), wishlist (products), saved jobs/candidates.	—	Many save systems — see Duplicates section for the unification recommendation.	—
Keyword filtering / muted words Hide content with chosen words.	● COMPLETE	muted_keywords filtered by MUTE_FILTER in feeds + promoted slots.	server.js muted_keywords	—	—
Mute / snooze / archive Mute threads, snooze, archive.	● COMPLETE	Mute-with-expiry (chat_mute_until = snooze), archive per thread, notification DND.	users.chat_mute_until	—	—
Advanced search operators Filter by author, date, has-file.	● COMPLETE	from:/#tag/since:/until:/has:/min_likes:/min_reposts/sort: with a tappable cheatsheet; scoped message search.	server.js parsePostSearch	—	—
Bulk actions Select-many to delete/label/move.	● COMPLETE	Multi-select in chats and contacts, bulk report actions, bulk applicant moves.	—	—	—
Accounts, Access & Sync					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Account switching Multiple accounts without logging out.	● MISSING Medium	One token per session; no switcher.	—	Real need: owners running personal + business accounts. Store multiple tokens + a switcher sheet.	Med
Multi-device sync Consistent experience across devices.	● COMPLETE	Server-authoritative state + revocable sessions + SSE read-sync across devices.	server.js read-self	—	—
Desktop companion / power layout Multi-column or split-view desktop.	● PARTIAL Medium	Desktop two-pane Beam + right rail.	index.html body.beam2	Missing: multi-column deck.	Low
QR / passkey login & 2FA QR desktop login, passkeys, 2FA.	● PARTIAL Medium	QR device-link ✓, TOTP 2FA + recovery ✓, device sessions ✓.	auth.js	Missing: passkeys (WebAuthn). Face ID comes free with the iOS app.	Med
Offline support Read and queue actions offline.	● PARTIAL Large	SW cached shell, offline banner, failed-send retry on resync.	sw.js, rtResync	Missing: offline read cache + queued actions. Matters most on mobile — design into the iOS app data layer from day one.	Med
Custom themes & display settings Dark mode, accents, text size, density.	● COMPLETE	Black/Light/System themes, 12+custom accent colors, larger text, reduced motion, per-chat wallpapers.	index.html setTheme, applyAccent	No density setting (minor).	—
Privacy, Safety & Moderation					
Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Block / restrict / report Block users, restrict, report content.	● COMPLETE	Blocks enforced both directions everywhere; report sheet with full reason taxonomy; restrict-adjacent contact controls.	server.js blocks, REPORT_REASONS	—	—
Role & permission granularity Fine-grained admin roles.	● PARTIAL Medium	Staff RBAC (8 scopes), business team perms, group multi-admin.	auth.js requirePerm	Missing: custom community roles / per-channel permissions (same row as Discord).	Med
Member onboarding / rules gate Agree to rules before participating.	● MISSING Small	—	—	Per-group rules gate — small.	Low
Data export / download your data Export content and account data.	● COMPLETE	Owner-scoped JSON export + GDPR/CCPA request tracking with deadlines.	server.js /api/account/exp ort, data_requests	—	—
Spam & abuse protection Automated spam detection, rate limiting.	● COMPLETE	Per-route rate limits, wallet velocity caps + freeze, notification quality filters, auto-moderation, account enforcement.	server.js rateLimit, walletVelocityCh eck	—	—
Keyword / auto-moderation Auto-flag content matching rules.	● COMPLETE	Heuristic+AI moderation to the reports queue + admin AI scans; member-side muted words.	server.js moderatePost	Per-group owner AutoMod rules would extend it.	—
Content reporting & appeals flow Report and appeal moderation actions.	● COMPLETE	Reports (full taxonomy, admin queue, bulk) + appeals filed from the sign-in screen with password re-proof, staff grant/deny.	server.js appeals	Complete loop — rare even among big platforms.	—

ACCESSIBILITY & LOCALIZATION

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Alt text for images Descriptive alt text with reminders.	● COMPLETE	Alt-text field + AI generation + rendered alt.	server.js /api/ai/alt-text	No upload reminder nudge (tiny).	—
Translation & transcription Inline translation; voice transcription.	● COMPLETE	Post + message translate; voice-note transcription with captions.	—	—	—
Captions & live captions Video captions; real-time call captions.	● MISSING Large	—	—	Two builds: caption tracks on video (medium), live call captions (large).	Med
Display accessibility Font scaling, contrast, reduced motion, screen reader.	● COMPLETE	Larger text, reduced motion, focus rings, aria-live announcer, labeled icon buttons, RTL.	index.html ally	—	—

COMMERCE & BUSINESS QOL (ENGINE)

Feature & Description	Status	Evidence Found	Files / Modules	Notes · Gap · Difference	Priority
Product variants & catalog structure Sizes/colors, SKUs, collections.	● COMPLETE	Variants + categories/sections + specs.	—	—	—
Business hours & auto-away Show hours; auto-reply outside them.	● COMPLETE	Hours with open-now badge + away schedule outside hours.	—	—	—
Reviews & Q&A on listings Reviews plus public Q&A.	● COMPLETE	Product reviews (verified buyers, media) + product Q&A + business reviews/Q&A.	—	—	—
Abandoned-cart / re-engagement Recover carts; re-engage buyers.	● COMPLETE	Cart recovery + re-engagement push, both anti-spam-hardened.	—	—	—
Draft & scheduled listings/posts Drafts; schedule products/content.	● PARTIAL Small	Post drafts + scheduling ✓.	—	Missing: product drafts / scheduled listing publication.	Low
Quick / saved replies Canned responses.	● COMPLETE	Quick replies with shortcuts.	—	—	—
Appointments & booking Book, reschedule, get reminders.	● PARTIAL Small	Full booking (slots, deposits, confirm/decline/cancel).	—	Missing: automated pre-appointment reminder notifications (a small flusher on existing infra).	Med
Gift cards & invoicing Sell gift cards; payable invoices.	● COMPLETE	Both, deeply (split tender, admin program; quotes → invoices).	—	—	—

Complete Features — 188 fully implemented

Everything verified as fully shipped, grouped by the specification's sections. (The 30 Different-implementation features in Section 2 add further effective coverage on top of these.)

1. X (formerly Twitter) 27 complete

- ✓ **For You (algorithmic timeline)** — Personalized, ranked feed of recommended posts.
- ✓ **Following timeline** — Reverse-chronological feed of accounts you follow.
- ✓ **Bookmarks & bookmark folders** — Save posts privately; folders to organize them.
- ✓ **Surveys / in-feed polls in For You** — Native survey cards inside the For You feed.
- ✓ **Text posts** — Short posts; longer posts for Premium.
- ✓ **Edit post** — 1-hour window to edit a published post.
- ✓ **Polls** — Attach a multi-option poll.
- ✓ **Quotes & reposts** — Repost or quote-post with commentary.
- ✓ **Threads** — Chain multiple posts into a connected sequence.
- ✓ **Scheduled posts & drafts** — Schedule posts; synced drafts.
- ✓ **Paid promotion label** — Disclosure label for sponsored content.
- ✓ **Gold / grey / affiliate badges** — Org verification; affiliate badges for linked accounts.
- ✓ **Profile customization** — Header, bio, links, custom app icons.
- ✓ **Communities** — Topic-based group spaces.

2. LinkedIn (+ Premium, Sales Navigator, Recruiter) 22 complete

- ✓ **Professional profile** — Structured CV-style profile.
- ✓ **Skills & endorsements** — List skills; connections endorse.
- ✓ **Creator mode / newsletters** — Creator tools and native newsletters.
- ✓ **Recommendations** — Written peer recommendations.
- ✓ **Who viewed your profile** — See who viewed you; history on Premium.
- ✓ **Professional feed** — Algorithmic feed from your network.
- ✓ **Short-form vertical video feed** — TikTok-style vertical video tab.
- ✓ **Saved posts / collections** — Bookmark posts and organize them.
- ✓ **Video & LinkedIn Live** — Native video and live broadcasting.
- ✓ **Hashtags & follows** — Follow topics/hashtags.
- ✓ **AI writing assistance** — AI-drafted posts, outreach, profile insights.

3. WhatsApp & WhatsApp Business 23 complete

- ✓ **1:1 & group chat** — Text, media, voice notes; groups.
- ✓ **Voice & video calls** — 1:1 and group calling.
- ✓ **File & media sharing** — Documents, photos, video, contacts, location.
- ✓ **Channels (broadcast)** — One-to-many broadcast channels.
- ✓ **Multi-device linking** — One account on multiple devices.
- ✓ **Username handles** — @usernames replacing phone numbers.
- ✓ **Message reactions, edit & pin** — Reactions, edit window, pinned messages.
- ✓ **Voice messages** — Record-and-send audio.
- ✓ **Status / Stories** — Ephemeral 24-hour updates.
- ✓ **Communities** — Group-of-groups with announcements.
- ✓ **Disappearing messages** — Auto-delete after a set time.
- ✓ **Chat lock & locked chats** — Lock chats behind passcode/biometric.

4. Telegram (+ Premium, Bots) 14 complete

- ✓ **Cloud chats & sync** — Cloud-stored messages, synced across devices.
- ✓ **Voice & video calls + video chats** — Calls, group video, live streams.
- ✓ **Stories** — Ephemeral stories for users/channels/businesses.
- ✓ **Channels (unlimited subscribers)** — One-to-many broadcast, 100% reach.
- ✓ **Folders** — Organize chats into custom folders.
- ✓ **Voice-to-text transcription** — Transcribe voice/video messages.
- ✓ **Saved Messages / personal cloud** — Personal space for notes and files.

5. Shopify 9 complete

- ✓ **Collections** — Group products into browsable collections.
- ✓ **Product & inventory management** — Products, variants, vendors, stock.
- ✓ **Shopify Payments** — Built-in card processing with fraud analysis.
- ✓ **Payment links** — Sell via a shareable checkout link.
- ✓ **Gift cards & invoicing** — Sell gift cards; send invoices.

- ✓ **Search & trending** — Keyword search, trends, cashtags.
- ✓ **Lists** — User-curated account groups viewable as a feed.
- ✓ **Improved Cashtags** — Enhanced ticker experience for finance discovery.
- ✓ **Spaces (live audio)** — Host/join live audio rooms.
- ✓ **X Chat / DMs** — Direct messaging; encrypted chat; shared media view.
- ✓ **Group chats in X Chat** — Multi-person group messaging.
- ✓ **Message requests (verified gating)** — Restrict inbound DMs.
- ✓ **Creator subscriptions** — Paid monthly subscriptions for exclusive content.
- ✓ **Exclusive / subscriber-only threads** — Paywall specific threads.
- ✓ **Tips** — One-off payments to creators.
- ✓ **Post & account analytics** — Impressions, engagement, audience metrics.
- ✓ **Grok assistant** — In-app AI: ask, summarize, edit pics, voice.
- ✓ **Privacy controls** — Protected posts, reply controls, blocking, muting.

- ✓ **Scheduled posts** — Natively schedule posts.
- ✓ **Unlimited people browsing** — Browse profiles without commercial limits.
- ✓ **Voice messages in DMs** — Record and send audio in chat.
- ✓ **Scheduled messages** — Schedule a DM to send later.
- ✓ **Job listings & applications** — Search and apply; Easy Apply.
- ✓ **Job posting (employer)** — Post roles and manage applicants.
- ✓ **Salary & interview prep** — Salary insights and interview prep tools.
- ✓ **Applicant insights** — How you rank against the applicant pool.
- ✓ **AI-assisted job matching / 'Jobs for you'** — AI recommends roles, tailors applications.
- ✓ **LinkedIn Learning** — Professional course library.
- ✓ **Content & page analytics** — Post performance and follower analytics.

- ✓ **Polls in chats** — Polls in group and 1:1 chats.
- ✓ **Business profile** — Name, description, hours, address, category, logo.
- ✓ **Product catalog** — Showcase products with photos/prices.
- ✓ **Cart & in-chat ordering** — Customers order catalog items in-chat.
- ✓ **Labels** — Tag/organize conversations.
- ✓ **Broadcast lists** — One message to up to 256 contacts.
- ✓ **Green tick (official business)** — Verified business badge.
- ✓ **Quick replies** — Saved responses.
- ✓ **Native payments** — In-chat payments.
- ✓ **Click-to-chat & QR entry points** — Links/QR that open a chat.
- ✓ **Greeting & away messages** — Auto-messages for first contact / off-hours.

- ✓ **Last-seen / privacy granularity** — Fine-grained who-can-see controls.
- ✓ **Business profile** — Hours, location, greeting, quick replies.
- ✓ **Chat tags / labels** — Tag business conversations.
- ✓ **Quick replies & greetings** — Saved answers; auto first message.
- ✓ **Away messages & opening hours** — Auto-responses outside hours, visible schedule.
- ✓ **Native payments API** — Cards, Apple/Google Pay via providers.
- ✓ **Paid subscriptions & content** — Subscription tiers; pay-to-unlock media.

- ✓ **Abandoned-cart recovery** — Automated reminders to recover carts.
- ✓ **Discounts & bundles** — Codes, automatic/stacked discounts, bundles.
- ✓ **Shopify Inbox (chat selling + AI)** — Sell and support via chat with AI assist.
- ✓ **Sales & customer dashboards** — Sales, behavior, finance reports.

6. TikTok & TikTok Shop16 complete

✓ For You feed (discovery) — Algorithmic feed reaching non-followers.

✓ Photo mode & carousels — Multi-image posts.

✓ LIVE streaming — Real-time broadcast with interaction.

✓ Stories & TikTok Notes — Ephemeral stories + text posts.

✓ Creator dashboard & analytics — Views, engagement, audience.

✓ Subscriptions — Paid creator subscriptions.

✓ Shoppable video — Tag products in feed videos.

✓ Showcase / Shop tab — Storefront on profile + Shop tab.
7. eBay8 complete

✓ Promoted listings — Pay to boost visibility.

✓ Seller Hub — Central dashboard for listings/orders/performance.

✓ Listing catalog / item specifics — Structured product data and categories.

✓ Best Offer / negotiation — Buyers submit offers; sellers counter.
8. Discord8 complete

✓ Servers (communities) — Standalone community spaces with channels.

✓ Channel & DM pinning — Pin chats to the top.

✓ Stage channels — Moderated audio events.

✓ Video calls & screen share — Group video and screen sharing.
9. Slack9 complete

✓ Channels (public/private) — Topic/project channels.

✓ DMs & group DMs — Direct and small-group messaging.

✓ Notification controls — Per-channel notification preferences.

✓ Lists — Track/approve/complete tasks.

✓ File sharing & clips — Files; short audio/video clips with transcripts.
10. Microsoft Teams7 complete

✓ Teams & channels — Org units with channels.

✓ @mentions & threaded replies — Mentions and per-message replies.

✓ 1:1 & group chat — Persistent chat with rich formatting.

✓ Saved messages & pin chats — Save messages; pin priority chats.
11. Google Business Profile9 complete

✓ Business listing — Name, category, hours, contact in search.

✓ Photos & videos — Business imagery.

✓ Products & services — List offerings with prices.

✓ Verification — Verify listing ownership.

✓ Reviews & ratings — Collect and respond to reviews.
12. Atwe AI — cross-platform assistant benchmark7 complete

✓ Natural-language chat — Assistant Q&A grounded in your business.

✓ Explain / translate — Explain complex messages; translate.

✓ Write & schedule posts — Draft and queue feed content.

✓ Draft messages / replies — Compose DMs, outreach, replies.
13. Cross-Platform Quality-of-Life, Privacy & Moderation29 complete

✓ Message editing & deletion — Edit within a window; delete for self/everyone.

✓ Pinned messages — Pin key messages.

✓ Reply / quote & forwarding — Inline reply, quote, forward.

✓ Voice notes with transcription — Audio messages auto-transcribed.

✓ Disappearing / self-destruct messages — Auto-expiring messages.

✓ Reactions & custom reactions — Emoji reactions, custom/animated options.

✓ Typing & read receipts — Typing indicators; toggleable receipts.

✓ Granular notification settings — Per-chat mute, keyword alerts, quiet hours.

✓ Bookmarks / saved & folders — Save privately; organize into folders.

✓ Keyword filtering / muted words — Hide content with chosen words.

✓ Mute / snooze / archive — Mute threads, snooze, archive.

✓ Advanced search operators — Filter by author, date, has-file.

✓ Bulk actions — Select-many to delete/label/move.

✓ Multi-device sync — Consistent experience across devices.

✓ Custom themes & display settings — Dark mode, accents, text size, density.

✓ Product catalog & listings — Products with media and descriptions.

✓ LIVE shopping — Sell in real time during streams.

✓ Native in-app checkout — Buy without leaving the app.

✓ Mall / Shop centre & recommendations — Shopping tab with personalized discovery.

✓ Seller Center — Dashboard for catalog/orders/analytics.

✓ Fulfillment & returns — Orders, shipping, returns handling.

✓ Shop ads & product cards — Shopping ad formats driving to checkout.

✓ Affiliate program — Commission-based creator partnerships.

✓ Ratings & feedback — Buyer/seller feedback and ratings.

✓ Managed payments & payouts — Integrated payments to bank.

✓ Buyer & seller protection — Money-back guarantee, dispute resolution.

✓ Shipping labels & tracking — Discounted labels and tracking.

✓ Events & scheduled events — Server event calendar.

✓ AutoMod (incl. AI) — Keyword/spam auto-moderation with AI.

✓ Server discovery — Public community directory.

✓ Conversation summaries (AI) — AI recap of busy channels.

✓ Bookmarks & pins — Pin messages, bookmark links per channel.

✓ Huddles — Lightweight drop-in audio/video with screen share.

✓ Slackbot / AI assistant — Personal AI agent: search, drafting, memory.

✓ AI recap & translations — Channel recaps + one-click translation.

✓ Screen share & presenter tools — Share screen; presenter modes.

✓ File sharing (per channel) — Files stored and co-edited per channel.

✓ Copilot (AI) — AI recap, summaries, drafting.

✓ Posts / updates — Share offers and news on the profile.

✓ Bookings / appointments — Book from the profile.

✓ Q&A — Public questions and answers.

✓ Messaging — Customers message the business.

✓ Write product descriptions — Generate storefront copy.

✓ Permission-scoped access — AI only sees what the user can see.

✓ Preview-before-action — Draft/preview + approval before executing.

✓ Block / restrict / report — Block users, restrict, report content.

✓ Data export / download your data — Export content and account data.

✓ Spam & abuse protection — Automated spam detection, rate limiting.

✓ Keyword / auto-moderation — Auto-flag content matching rules.

✓ Content reporting & appeals flow — Report and appeal moderation actions.

✓ Alt text for images — Descriptive alt text with reminders.

✓ Translation & transcription — Inline translation; voice transcription.

✓ Display accessibility — Font scaling, contrast, reduced motion, screen reader.

✓ Product variants & catalog structure — Sizes/colors, SKUs, collections.

✓ Business hours & auto-away — Show hours; auto-reply outside them.

✓ Reviews & Q&A on listings — Reviews plus public Q&A.

✓ Abandoned-cart / re-engagement — Recover carts; re-engage buyers.

✓ Quick / saved replies — Canned responses.

✓ Gift cards & invoicing — Sell gift cards; payable invoices.
- ATWE — Complete Product & Feature Audit · Internal, confidential

Section 3 · Complete Features

Partially Implemented — 82 features

The core exists; the remainder is named. “Work left” sizes only the missing part, not a rebuild. Sorted by priority.

FEATURE	AREA	WHAT EXISTS TODAY	WHAT IS MISSING	WORK LEFT	PRIORITY / RISK
Meta Business Agent (24/7 AI) WhatsApp & WhatsApp Business	Beam	Greeting + away auto-messages (hours-aware schedule).	Missing: an AI that actually answers from the business's data with handoff — the single highest-leverage Atwe AI gap (pairs with rows in Section 12).	Large	High Competitive risk
Chat automation / profile bots (AI receptionist) Telegram (+ Premium, Bots)	Beam	Greeting/away auto-messages.	Same flagship gap as WhatsApp's Business Agent — counted once in the roadmap.	Large	High Competitive risk
Sidekick (admin AI) Shopify	Engine	AI writes product copy, drafts CS answers, powers shopping search; dashboards exist separately.	Missing: a unified 'run my store' AI with proactive insights — the business half of the flagship AI program.	Large	High Competitive risk
Search across your data Atwe AI — cross-platform assistant benchmark	Atwe	Digest reads your network's posts; summarize-chat reads the open thread.	Missing: true retrieval over YOUR posts/chats/orders/files ('what did the supplier quote me?'). Flagship gap #2.	Large	High Competitive risk
Auto-reply / receptionist Atwe AI — cross-platform assistant benchmark	Atwe	Greeting/away auto-messages with schedule + cooldowns.	Missing: AI answering from business data (hours/products/FAQs) with per-business opt-in + handoff. FLAGSHIP GAP #1 — appears across WhatsApp/Telegram/Shopify benchmarks.	Large	High Competitive risk
Media posts (photo/video) X (formerly Twitter)	Home	Photos (≤4, mosaic grid) + GIFs on main posts; video ships via Reels/shorts (feed_posts) and video stories (~3.5MB cap).	Missing: native video on main feed posts, and any long/HD video (competitors allow hours/GB). Real fix is object storage + CDN first (see Architecture).	Medium	Med Moderate
Grok Voice mode + widgets X (formerly Twitter)	Home	Voice input exists (browser SpeechRecognition into the AI composer).	Missing: spoken replies (conversational voice mode) and OS widgets — both natural iOS-app work.	Medium	Med Moderate
Passkeys / 2FA X (formerly Twitter)	Home	TOTP 2FA (RFC 6238) + single-use recovery codes + QR device-link login + revocable device sessions.	Missing: WebAuthn passkeys. Face ID unlock arrives naturally with the iOS app.	Medium	Med Moderate
Accessibility (alt text, captions) X (formerly Twitter)	Home	Image alt text (+AI generation), focus rings, reduced motion, larger text, aria-live announcer, labeled controls, RTL.	Missing: video captions (no caption track support).	Medium	Med Moderate
Verifications (identity & workplace) LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Business verification + affiliation badges (workplace linkage, two-sided approval).	Missing: person ID verification (same item as X's gov-ID row).	Medium	Med Moderate
Posts, articles, documents LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Posts ✓; long-form via newsletters (Different).	Missing: PDF/document carousel posts — genuinely useful for a business audience (decks, one-pagers).	Medium	Med Moderate
Candidate pipeline / projects LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Pipeline statuses (applied → hired) + bulk moves + team job permissions.	Missing: shared hiring notes and multi-job candidate projects.	Medium	Med Moderate
Recruiter search & filters LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Candidates board with skill/location/schedule/remote/rate filters + saved candidates + AI matchmaker rank.	Missing: deep filter set (boolean, years-of-experience, education filters).	Medium	Med Moderate
Advanced lead & account search LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Business directory (industry, verified, near-me) + people search with in-network ranking.	Missing: a purpose-built prospecting search (size, role, activity filters). Big Engine opportunity post-launch.	Large	Med Moderate
Lead & account lists LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Saved candidates, contacts, chat labels, user lists all exist.	Missing: a dedicated sales-lead list with pipeline states (ties to the CRM theme).	Medium	Med Moderate
AI-assisted prospecting messages LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	AI drafts replies/messages (write tasks, agent draft_reply).	Missing: auto-grounding the draft in the target's profile/activity. Small prompt+retrieval change.	Small	Med Moderate
HD media sharing WhatsApp & WhatsApp Business	Beam	Media is client-downscaled and size-capped (~3.5MB video).	Missing: an HD/original-quality toggle. Gated on object-storage migration (Architecture).	Medium	Med Moderate
Meta AI in-chat WhatsApp & WhatsApp Business	Beam	Composer AI (improve/rephrase/translate/suggest-reply/summarize-chat) + selection 'Fix with Atwe AI' toolbar + message translate/transcribe.	Missing: summoning the AI as a conversational participant in-thread, and image generation.	Medium	Med Moderate
WhatsApp Flows (rich in-chat forms) WhatsApp & WhatsApp Business	Beam	Group-cloud forms exist (reusable fields + dated entries) for internal teams.	Missing: customer-facing in-chat forms a business can send.	Medium	Med Moderate
Large file sharing Telegram (+ Premium, Bots)	Beam	File messages exist (any type, original filename).	Size-capped at megabytes (base64-in-DB). Object storage unlocks big files (Architecture #1).	Medium	Med Moderate

FEATURE	AREA	WHAT EXISTS TODAY	WHAT IS MISSING	WORK LEFT	PRIORITY / RISK
Message editing, pinning & threads Telegram (+ Premium, Bots)	Beam	Edit + pin ✓ everywhere; DM side-threads ✓ (email-style multiple conversations per person).	Missing: topic threads INSIDE groups (Telegram/Discord/Slack pattern) — recurring theme, see Beam gaps.	Medium	Med Moderate
Local & alternative payment methods Shopify	Engine	Stripe Checkout provides cards + its wallet set.	Missing: Apple Pay/Google Pay explicitly enabled — near-free via Stripe and high-impact for the iOS app.	Small	Med Moderate
Email & marketing automation Shopify	Engine	Transactional email (orders, shipping, login alerts), cart-recovery nudges, re-engagement push.	Missing: a campaign builder (segments, sends, stats) for businesses.	Large	Med Moderate
Shopify Balance & Credit Shopify	Engine	Wallet balance IS the money account (ledger, pots, payouts to bank via Stripe Connect); Atwe Card exists as a waitlist product.	Missing: the live card program (issuing partner + KYC) and any credit product.	Large	Med Moderate
Longer video & horizontal video TikTok & TikTok Shop	Home	Video posts exist; portrait/landscape both render.	Length/size capped ~3.5MB — object storage unlocks this (Architecture #1).	Medium	Med Moderate
AI-assisted listing (photo-to-listing) eBay	Engine	AI drafts product descriptions from name+kind today.	Missing: the photo-first flow (vision → full draft listing). High-value AI roadmap item.	Medium	Med Moderate
Threads & forum channels Discord	Beam	Message replies + DM side-threads exist.	Missing: topic threads inside groups + forum-style channels (the recurring Beam theme).	Medium	Med Moderate
Roles & permissions Discord	Beam	Group roles (creator/admin/member), channel post-restriction, business-team permissions, staff RBAC.	Missing: custom roles + per-channel permission matrices.	Medium	Med Moderate
Threads Slack	Beam	Reply-with-quote exists on every message.	Missing: collapsed thread views in groups (the recurring Beam theme — one build covers Slack/Discord/Teams/Telegram rows).	Medium	Med Moderate
Customer contacts / lightweight CRM Slack	Beam	Contacts with saved fields + auto-fill, chat labels ('new/pending/paid' pattern), reverse contacts.	Missing: deals/pipelines. The 'Engine CRM' theme — one of the biggest coherent post-launch opportunities.	Large	Med Moderate
Agents (Agentforce / custom / MCP) Slack	Beam	One built-in agent with 4 confirm-gated tools (event, invoice, post, reply).	Missing: more tools + custom/third-party agents. Tool expansion is the near-term path (Section 12).	Large	Med Moderate
Threaded channel conversations Microsoft Teams	Beam	Same as the Slack/Discord threads rows — replies exist, no thread panes.	One build resolves all four platforms' thread rows.	Medium	Med Moderate
Video meetings Microsoft Teams	Beam	Group calls (≤8) + shareable call links + events with ICS.	Missing: true scheduled-meeting infra (lobby, larger capacity, calendar-native). SFU infra required beyond ~8 (Architecture).	Large	Med Moderate
AI-assisted review replies Google Business Profile	Engine	AI CS-answer drafts exist for business Q&A.	Missing: the same button on review responses — a one-day wire-up of existing AI.	Small	Med Moderate
Summarize threads / meetings Atwe AI — cross-platform assistant benchmark	Atwe	Summarize-chat ✓ (DM + group).	Missing: call/meeting summaries (needs recording+transcription first).	Large	Med Moderate
Proactive daily briefing Atwe AI — cross-platform assistant benchmark	Atwe	'Catch me up' digest exists on demand; re-engagement push exists separately.	Missing: scheduled proactive delivery (a flusher + push carrying the digest — infra all exists).	Small	Med Moderate
Find businesses / leads Atwe AI — cross-platform assistant benchmark	Atwe	AI shopping concierge (products) + AI matchmaker (jobs/workers) exist.	Missing: 'find me 5 packaging suppliers near Boston' over the business directory — small addition to existing retrieval+rank pattern.	Small	Med Moderate
Send messages on your behalf Atwe AI — cross-platform assistant benchmark	Atwe	draft_reply produces text to copy.	Missing: a confirmed send_message tool (the confirm-card pattern already exists to gate it).	Small	Med Moderate
Manage appointments Atwe AI — cross-platform assistant benchmark	Atwe	create_event agent tool exists.	Missing: appointment tools (book/confirm/decline) — routes all exist to call.	Small	Med Moderate
QR / passkey login & 2FA Cross-Platform Quality-of-Life, Privacy & Moderation	All	QR device-link ✓, TOTP 2FA + recovery ✓, device sessions ✓.	Missing: passkeys (WebAuthn). Face ID comes free with the iOS app.	Medium	Med Moderate
Offline support Cross-Platform Quality-of-Life, Privacy & Moderation	All	SW cached shell, offline banner, failed-send retry on resync.	Missing: offline read cache + queued actions. Matters most on mobile — design into the iOS app data layer from day one.	Large	Med Moderate
Role & permission granularity Cross-Platform Quality-of-Life, Privacy & Moderation	All	Staff RBAC (8 scopes), business team perms, group multi-admin.	Missing: custom community roles / per-channel permissions (same row as Discord).	Medium	Med Moderate
Appointments & booking Cross-Platform Quality-of-Life, Privacy & Moderation	All	Full booking (slots, deposits, confirm/decline/cancel).	Missing: automated pre-appointment reminder notifications (a small flusher on existing infra).	Small	Med Moderate
Custom / list timelines X (formerly Twitter)	Home	Lists exist with full CRUD + member timelines (GET /api/social/lists/:id/timeline), reachable from the Me hub and profile 'Add to list'.	Missing: lists as pinned home-feed tabs; saved-search timelines; AI-built timelines.	Small	Low Low — additive

Feature	Area	What exists today	What is missing	Work left	Priority / Risk
Livestream studio X (formerly Twitter)	Home	Go Live exists — one-to-many video broadcast + audio Spaces + group live, with live shopping pin.	Missing: a studio UI (scenes, overlays, stream tools). The broadcast itself works today.	Medium	Low Low — additive
Redesigned profile Video section X (formerly Twitter)	Home	The profile Media tab shows photo/video posts.	No video-only tab; trivial filter once video volume justifies it.	Small	Low Low — additive
About this account X (formerly Twitter)	Home	'Joined <Month Year>' on every profile; business accounts are visually distinct (app-shape avatar).	No full panel (username history, location). Small trust addition.	Small	Low Low — additive
Notifications + Priority tab X (formerly Twitter)	Home	Full notification feed with per-category prefs, quality filters (X-style), quiet hours, deep links.	Missing: a Priority/All split in the notifications screen.	Small	Low Low — additive
Open to work / hiring badges LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	#OpenToWork ring (off/recruiters/everyone visibility) + worker listing.	Missing: an employer-side 'Hiring' badge/frame.	Small	Low Low — additive
Polls & celebrations LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Polls ✓.	Missing: a celebration/milestone post type (new role, work anniversary). Small template addition.	Small	Low Low — additive
Connections (1st–3rd degree) LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Real request → accept graph, mutual-connection hints, friend-of-friend suggestions + feed boost, 'Followed by people you follow' proof.	Missing: explicit 2nd/3rd-degree labels in UI (the graph data supports computing them).	Small	Low Low — additive
Verified job postings LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Jobs display the poster's verified-business badge.	Missing: per-job verification stamp; small UI addition on existing signals.	Small	Low Low — additive
Real-time alerts (leads) LinkedIn (+ Premium, Sales Navigator, Recruiter)	Home	Alert infrastructure exists (job alerts, price-drop, restock).	Missing: alerts on people/accounts (job change, new post).	Medium	Low Low — additive
Polls, quizzes, reactions Telegram (+ Premium, Bots)	Beam	Polls + reactions ✓ (skill-assessment quizzes exist in the profile world).	Missing: quiz mode (right answers + stats) in chats; custom emoji reactions.	Small	Low Low — additive
Scheduled & silent messages Telegram (+ Premium, Bots)	Beam	Scheduled messages ✓ (DM + group, flusher-delivered).	Missing: silent send (no-notification delivery). Small flag through the send path.	Small	Low Low — additive
Online store builder Shopify	Engine	Every business gets a real storefront (header, sections/menu categories, bundles row, grouped grid) with zero setup.	Missing: theme/page customization. Atwe's bet is 'instant storefront' over 'store builder' — reasonable, but a hero-banner/accent option would help brands.	Medium	Low Low — additive
Storefront search Shopify	Engine	Marketplace search: full-text Best Match ranking + filters/sorts.	Missing: a search box inside a single store; no typo tolerance (needs pg_trgm).	Small	Low Low — additive
B2B net terms & automated invoicing Shopify	Engine	Invoices with due dates + overdue state exist; quotes convert to invoices.	Missing: net-terms automation and vaulted-card charging.	Medium	Low Low — additive
Ship + pickup in one cart Shopify	Engine	Local pickup exists per order when every physical item offers it.	Missing: mixed ship+pickup lines in one order.	Small	Low Low — additive
Campaign attribution Shopify	Engine	Affiliate sales, ad clicks/spend, coupon usage each tracked.	Missing: one attribution report joining them.	Small	Low Low — additive
Marketing data in analytics Shopify	Engine	Ad campaign spend/click trends exist per campaign.	Missing: ROAS joining ad spend to attributed sales.	Medium	Low Low — additive
Saved / favorites & playlists TikTok & TikTok Shop	Home	Feed-post saves + bookmarks exist.	Missing: playlists (ordered collections of videos).	Small	Low Low — additive
Short video creation TikTok & TikTok Shop	Home	Upload + immersive publishing works.	No in-app trim/edit. On iOS, native camera + Photos editing narrows this a lot.	Medium	Low Low — additive
Gifts & LIVE monetization TikTok & TikTok Shop	Home	Tips exist as one-off payments.	Missing: in-stream live gifting UX.	Medium	Low Low — additive
Fixed-price & auction listings eBay	Engine	Fixed-price listings + Make-an-Offer negotiation cover most of the intent.	Missing: timed auctions — already a documented 'deferred phase 2' decision in the codebase.	Medium	Low Low — additive
Text & voice channels Discord	Beam	Text channels ✓.	Missing: always-on drop-in voice rooms (calls are session-based). Group calls + Spaces cover scheduled needs.	Medium	Low Low — additive
Voice channels Discord	Beam	Group voice calls + audio Spaces.	Same gap as 'always-on voice rooms' above — counted once.	Medium	Low Low — additive
Search across everything Slack	Beam	Message-content search (visibility-correct, scoped or global) + in-chat search + global entity search.	Missing: group-cloud files/docs indexed into search.	Small	Low Low — additive
Scheduled send & forward-later Slack	Beam	Scheduled messages ✓.	Missing: scheduling a forward specifically (niche).	Small	Low Low — additive
Presence & status Microsoft Teams	Beam	Online/last-seen presence with privacy granularity.	Missing: custom status text/emoji ('In a meeting') — verified absent.	Small	Low Low — additive

FEATURE	AREA	WHAT EXISTS TODAY	WHAT IS MISSING	WORK LEFT	PRIORITY / RISK
Webinars & town halls Microsoft Teams	Beam	Events (tickets, capacity) + Go Live broadcasts cover the informal version.	Missing: registration flow + large-audience streaming infra.	Large	Low Low — additive
Co-authoring Office docs Microsoft Teams	Beam	Group Cloud sheets/notes are shared and multi-writer (last-write-wins + realtime push).	Missing: live cursors/merge (CRDT) — significant infra; demand-driven.	Large	Low Low — additive
Approvals & Shifts Microsoft Teams	Beam	Shifts/rota exists (Group Cloud schedule kind) + rosters.	Missing: an approvals workflow (request → approve trail).	Medium	Low Low — additive
Attributes Google Business Profile	Engine	Amenity tags exist on listings and services.	Missing: business-level attribute tags surfaced in the directory. Small schema+UI addition.	Small	Low Low — additive
Social profile links Google Business Profile	Engine	One website link on the profile.	Missing: multiple social links. Trivial addition.	Small	Low Low — additive
Call tracking & insights Google Business Profile	Engine	Business analytics: profile views, followers, reach, hiring, shopping tag-taps.	Missing: call/CTA-tap counters (small events to add).	Small	Low Low — additive
Calendar & email actions Atwe AI — cross-platform assistant benchmark	Atwe	create_event ✓ (Atwe events).	Missing: external calendar/email connectors (integrations phase).	Large	Low Low — additive
Admin AI-access controls Atwe AI — cross-platform assistant benchmark	Atwe	Platform-wide AI kill switch (feature flags).	Missing: granular scoping (per-surface AI controls).	Small	Low Low — additive
Mentions & @here/@everyone Cross-Platform Quality-of-Life, Privacy & Moderation	All	Group @mentions notify the named member (verified).	Missing: @everyone/@here broadcast ping for group admins.	Small	Low Low — additive
Scheduled & draft messages Cross-Platform Quality-of-Life, Privacy & Moderation	All	Scheduled ✓ server-side; drafts ✓ per conversation.	Drafts are device-local (localStorage), not synced across devices.	Small	Low Low — additive
Desktop companion / power layout Cross-Platform Quality-of-Life, Privacy & Moderation	All	Desktop two-pane Beam + right rail.	Missing: multi-column deck.	Medium	Low Low — additive
Draft & scheduled listings/posts Cross-Platform Quality-of-Life, Privacy & Moderation	All	Post drafts + scheduling ✓.	Missing: product drafts / scheduled listing publication.	Small	Low Low — additive

Missing Features — 107 not yet built

Grouped by specification section, priority-sorted, each with what building it requires and a Small / Medium / Large estimate. Items also flagged as skip candidates are cross-referenced to Section 6 — they remain fully listed here, per your instruction.

1. X (formerly Twitter) 15 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
ID verification (government ID) Gov-ID verification for an 'ID verified' label.	Stripe Identity would slot into the existing verification flow. Meaningful anti-impersonation signal for a business network.	Medium	Med	No
History tab (viewed posts) A tab showing posts you've previously viewed.	Would be a thin new endpoint + screen over existing data.	Small	Low	No
Text formatting (bold/italic) Rich formatting in posts.	Needs a safe rich-text composer + renderer. Low value for a business feed at launch.	Medium	Low	No
Quick-add saved/liked post to a new post Quote a saved or liked post into a fresh post.	Pure composer affordance over existing quote infrastructure.	Small	Low	No
Updated video editor + green-screen In-app video editor incl. green-screen.	On iOS the native camera/photo pipeline covers basic needs; a full editor is a large media investment.	Large	Low	Yes — see §6
Reply prioritization Verified/Premium replies ranked higher.	Deliberate neutrality is defensible; a 'verified first' sort toggle would be small.	Small	Low	No
Radar (real-time search) Real-time monitoring of topics/keywords.	A keyword-watch on posts reusing the saved-search pattern would cover the core.	Medium	Low	No
Community Notes Crowdsourced fact-check notes on posts.	A crowd program needs contributor reputation + consensus scoring — a heavy system. Not a launch blocker.	Large	Low	Yes — see §6
Creator revenue sharing Payouts from engagement by Premium users.	Different economics (requires a subscriber pool to fund it).	Large	Low	Yes — see §6
Media Studio Advanced media management & monetization dashboard.	Per-post analytics + Ads Manager exist; no media library dashboard.	Medium	Low	No
Free Premium via subscribed followers Enough paying followers unlocks Premium free.	—	Small	Low	Yes — see §6
X Pro (TweetDeck) Multi-column power-user dashboard.	Desktop already has the two-pane Beam layout + right rail; no multi-column deck.	Large	Low	Yes — see §6
AI feed tuning (natural language) Adjust your feed by asking the AI.	Could map NL requests onto the existing mute/interest signals.	Medium	Low	No
Edit profile picture with AI Generate/edit your avatar in-app.	Depends on adding an image-gen provider (see AI section 12).	Medium	Low	No
Reduced / no ads Fewer or zero ads on paid tiers.	A Pro perk toggle would be trivial to add (feed already knows the viewer's plan).	Small	Low	Yes — see §6

2. LinkedIn (+ Premium, Sales Navigator, Recruiter) 10 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Account IQ / Lead IQ AI-summarized account and lead intel.	An 'AI brief on this business' from public data would be a natural Atwe AI action.	Medium	Med	No
Profile / cover story video Short intro video on the profile photo.	Video stories exist; wiring one as a profile intro would be small-medium.	Small	Low	No
Collaborative articles Community-contributed AI-prompted articles.	—	Large	Low	Yes — see §6
TeamLink Warm intro paths through teammates' networks.	—	Medium	Low	Yes — see §6
ATS integrations 28+ applicant-tracking-system connectors.	—	Large	Low	Yes — see §6
Smart Links Trackable content links.	Payment links track pays; no trackable content links.	Medium	Low	No
Buyer intent signals Signals showing buying interest.	Profile views + storefront/product views could power a lightweight version later.	Large	Low	No
CRM sync Bi-directional Salesforce/HubSpot sync.	—	Large	Low	Yes — see §6

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Business insights Headcount trends, hiring patterns.	Needs longitudinal org data; natural once business adoption grows.	Large	Low	No
AI learning coach Conversational coach recommending courses.	Small Atwe AI retrieval action over the course catalog.	Small	Low	No

3. WhatsApp & WhatsApp Business 4 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Agent assignment & team inbox Route conversations to agents; shared inbox.	Extend team permissions to a shared inbox with assignment. One of the clearest business asks.	Large	High	No
Chatbot / flows Guided multi-step conversational flows.	Roadmap: part of the AI receptionist program (see the flagship row below).	Large	Med	No
Conversation analytics Delivery/read rates, response times.	Response-time + volume dashboard from existing at_messages data.	Medium	Med	No
Status & channel ads / paid channels Ads in Status; promoted/paid channels.	Ads exist in the feed; none in stories/channels.	Medium	Low	Yes — see §6

4. Telegram (+ Premium, Bots) 6 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Chatbot integration Attach a chatbot to a business account.	Same receptionist program.	Large	Med	No
Bot API Third-party bots with buttons/payments.	No external bot platform.	Large	Low	Yes — see §6
Mini apps / web apps Full HTML/JS apps embedded in chat.	—	Large	Low	Yes — see §6
Guest AI bots / bot-to-bot Tag AI bots into chats; chain bots.	Covered strategically by 'summon Atwe AI in-thread' (WhatsApp Meta-AI row).	Large	Low	Yes — see §6
Inline bots Invoke a bot in any chat to fetch content.	—	Large	Low	Yes — see §6
Ad revenue sharing Share of channel ad revenue.	—	Large	Low	Yes — see §6

5. Shopify 13 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
B2B catalogs & volume pricing Company profiles, wholesale pricing.	Wholesale tiers (per-buyer pricing, minimums) are a strong future fit for a business-to-business network.	Medium	Med	No
AI product-image tools Background removal, image enhancement.	Strong candidate for the AI roadmap alongside photo-to-listing.	Medium	Med	No
Native A/B testing Test storefront/checkout variants.	—	Large	Low	Yes — see §6
Delivery-promise dates at checkout Estimated arrival from carrier data.	True delivery-date promises need carrier ETA APIs.	Medium	Low	No
Shopify POS In-person selling synced with online.	—	Large	Low	Yes — see §6
Same-day local delivery (Uber Direct) Hyperlocal delivery fulfillment.	—	Large	Low	Yes — see §6
Shop Campaigns across AI/ad channels Native ad network on external AI surfaces.	—	Large	Low	Yes — see §6
Custom & advanced reports Deeper custom reporting.	CSV exports exist in a few places (forms/expenses); a report builder is later-stage.	Medium	Low	No
Capital / lending Merchant cash advances.	—	Large	Low	Yes — see §6
Multi-store / heatmap analytics Cross-store dashboards, heatmaps.	—	Large	Low	Yes — see §6
Agentic storefronts / Catalog (UCP) Sell inside external AI channels.	Strategic: exposing Atwe catalogs to AI shopping surfaces later.	Large	Low	Yes — see §6
AI store analysis AI-simulated shoppers flag conversion issues.	—	Medium	Low	No
Campaign Autopilot AI-run marketing campaigns.	Sponsored listings have budget pacing but no AI optimization.	Large	Low	No

6. TikTok & TikTok Shop 8 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
AI-label / disclosure for AI content Label AI-generated content.	A self-declare 'AI-generated' toggle + label is small and buys trust (pairs with Section 12).	Small	Med	No
Find Creators / matchmaking Recruit creators by category/followers/sales.	Natural extension of the affiliate program.	Medium	Med	No
Effects, filters & templates Creative effects and AI creative tools.	—	Large	Low	Yes — see §6
Duet / Stitch Respond to or remix others' videos.	Quote posts exist for text; no video remix.	Large	Low	Yes — see §6
TikTok One / brand campaigns Match creators with brand deals.	Related to 'Find Creators' below — one creator-marketplace concept.	Large	Low	No
Creator rewards / fund Payouts for qualifying content.	—	Large	Low	Yes — see §6
Auto-Post Auto-generate shoppable videos from listings.	AI-generated listing media is an AI-roadmap candidate.	Medium	Low	No
Sample management Send product samples to creators.	—	Medium	Low	Yes — see §6

7. eBay 3 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Bulk listing tools Create/edit many listings at once.	CSV import / bulk edit for catalog-heavy sellers.	Medium	Low	No
Authentication guarantee Third-party authentication for high-value items.	—	Large	Low	Yes — see §6
Global shipping program Simplified international selling.	—	Large	Low	Yes — see §6

8. Discord 11 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Server Insights (analytics) Member activity/retention analytics for owners.	Per-community owner analytics — reuse the analytics patterns that exist elsewhere.	Medium	Med	No
Server subscriptions / shop Paid member tiers per community.	Paid community membership is a credible business feature (mastermind groups, trade associations).	Medium	Med	No
Spoiler channels Whole channels hidden behind spoilers.	—	Small	Low	Yes — see §6
Server tags & per-server profiles Server tag + distinct identity per server.	—	Medium	Low	Yes — see §6
Clips Capture short clips of voice/stream moments.	—	Medium	Low	No
Soundboard & effects In-call sound effects.	—	Small	Low	Yes — see §6
Activities (embedded apps/games) Shared apps/games inside voice.	—	Large	Low	Yes — see §6
Bots & integrations Automated moderation/roles/utilities.	Same platform decision as Telegram's Bot API (counted once in the roadmap).	Large	Low	Yes — see §6
Onboarding & rules screening Member onboarding and rule gates.	A 'agree to rules before posting' toggle per group is small.	Small	Low	No
Server Shop (digital products & roles) Sell files/roles via a channel storefront.	Digital products with auto-delivery exist on storefronts; nothing community-scoped.	Medium	Low	No
Server boosts Members boost a server for perks.	—	Medium	Low	Yes — see §6

9. Slack 10 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Auto meeting notes AI notes/action items from calls.	Needs call recording + STT + summarize — a coherent 'meeting intelligence' build.	Large	Med	No
Workflow Builder No-code automations (triggers → steps).	A big, differentiating build for business ops; candidates: new-order → notify team, new-applicant → add to checklist.	Large	Med	No
Scheduled Slackbot tasks & actions Recurring AI tasks with approval.	'Every Monday, draft my week's posts' — pairs with agent upgrades.	Medium	Med	No
System audio share Share device audio during screen share.	—	Small	Low	Yes — see §6

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Inline AI charts Turn numbers in a message into a chart.	—	Medium	Low	No
Profile & file summaries AI summary before you open something.	Small AI affordances once data-RAG exists.	Small	Low	No
CRM in Slack Create/update CRM records in chat.	Depends on the Engine CRM theme.	Large	Low	No
AI-suggested sidebar sections AI files a new channel for you.	—	Small	Low	Yes — see §6
Skills (reusable AI) Shareable AI skills teammates invoke.	—	Medium	Low	Yes — see §6
App marketplace / integrations Third-party app connectors.	—	Large	Low	Yes — see §6

10. Microsoft Teams 9 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Live captions & translation Real-time captions in calls.	Accessibility-relevant; heavy (streaming STT).	Large	Med	No
Recording & transcription Record meetings; auto transcripts.	Part of the 'meeting intelligence' build with auto-notes.	Large	Med	No
Breakout rooms Split a meeting into rooms.	—	Large	Low	Yes — see §6
Phone system / PSTN Cloud calling to phone numbers.	—	Large	Low	Yes — see §6
Intelligent recap & speaker insights AI meeting timeline: topics, action items.	Follows recording+transcription.	Large	Low	No
Tabs & app integration Pin apps as tabs in channels.	—	Large	Low	Yes — see §6
Loop components Live snippets that sync everywhere pasted.	—	Large	Low	Yes — see §6
Copilot agents / Copilot Studio Build custom AI agents.	Same as Slack custom agents — future platform phase.	Large	Low	Yes — see §6
Whiteboard Shared visual canvas in meetings.	—	Large	Low	No

12. Atwe AI — cross-platform assistant benchmark 15 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Photo-to-listing One photo → full draft listing.	Vision → title/copy/category/price draft. High-leverage seller magic; models can do it today.	Medium	High	No
Create a storefront Stand up a shop from a prompt.	Add create_product/update_storefront agent tools with the existing confirm-card pattern. A stated Atwe AI goal.	Medium	High	No
Analyze sales / analytics Interpret dashboards, surface insights.	Feed shop/business analytics JSON into an AI explain endpoint. A stated Atwe AI goal.	Small	High	No
Persistent memory of your context AI remembers people, projects, preferences.	A per-user memory profile injected into prompts is a contained build.	Large	Med	No
Edit / enhance product photos Remove backgrounds, restyle images.	Needs an image provider; pairs with photo-to-listing.	Medium	Med	No
Generate images / media Create images for posts/products.	Same provider dependency.	Medium	Med	No
Recurring scheduled AI tasks AI does a task on a schedule.	'Every Friday, summarize my orders' — pairs with proactive briefing.	Medium	Med	No
Agent workflows / chaining Multi-step automations across tools.	Multi-step plans with a single approval summary — natural evolution of the current pattern.	Large	Med	No
Audit logs for AI actions Every AI action tracked and reviewable.	Tag agent-confirmed actions into platform_events — small and worth doing early.	Small	Med	No
Human handoff AI → human team member on demand.	Ships as part of the AI receptionist design.	Small	Med	No
AI-content labeling Disclose AI-generated content.	Self-declare toggle + label (same row as TikTok's).	Small	Med	No
Update records (CRM) in chat Create/edit records conversationally.	Depends on Engine CRM.	Large	Low	No
Run marketing campaigns (autopilot) AI optimizes bids/timing/targeting.	Budget pacing exists in the ads auction; no AI optimization.	Large	Low	No

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Auto-generate storefront/video content Turn listings into shoppable media.	—	Large	Low	No
Generate purchase orders / restock POs and inventory transfers from stock data.	Stock data + restock alerts exist.	Medium	Low	No

13. Cross-Platform Quality-of-Life, Privacy & Moderation 3 missing

FEATURE	WHAT BUILDING IT WOULD REQUIRE	SIZE	PRIORITY	SKIP CANDIDATE?
Account switching Multiple accounts without logging out.	Real need: owners running personal + business accounts. Store multiple tokens + a switcher sheet.	Medium	Med	No
Captions & live captions Video captions; real-time call captions.	Two builds: caption tracks on video (medium), live call captions (large).	Large	Med	No
Member onboarding / rules gate Agree to rules before participating.	Per-group rules gate — small.	Small	Low	No

Optional — 45 features you probably don't need

Recommendations only. Every one of these still appears with full detail in Sections 2 and 5 — nothing was removed from the audit. The common threads: platform bets that need scale first (bot APIs, app marketplaces), consumer-entertainment mechanics with weak business fit, hardware/logistics operations, and competitor-specific pricing gimmicks.

FEATURE	BENCHMARK SOURCE	WHY YOU PROBABLY DON'T NEED IT (RECOMMENDATION ONLY — KEPT IN THE AUDIT ABOVE)
Updated video editor + green-screen	X (formerly Twitter)	Native iOS capture + external editing apps cover this for a business audience; revisit only if video becomes core.
Community Notes	X (formerly Twitter)	Requires a large, active user base to function; premature before scale.
Creator revenue sharing	X (formerly Twitter)	X's model funds payouts from Premium fees; Atwe monetizes tools + ads instead. Skip unless strategy changes.
Free Premium via subscribed followers	X (formerly Twitter)	A pricing gimmick tied to X's model; adds accounting complexity for little strategic value.
X Pro (TweetDeck)	X (formerly Twitter)	Power-user niche; the desktop two-pane covers the mainstream need. Revisit with a desktop push.
Reduced / no ads	X (formerly Twitter)	Decide with pricing strategy; cheap to add later.
Collaborative articles	LinkedIn (+ Premium, Sales Navigator, Recruiter)	An editorial program more than a feature; low fit for Atwe's stage.
TeamLink	LinkedIn (+ Premium, Sales Navigator, Recruiter)	Sales-Navigator-specific; needs org-level seat data Atwe doesn't model yet.
ATS integrations	LinkedIn (+ Premium, Sales Navigator, Recruiter)	Integration ecosystem work; only relevant once large employers arrive.
CRM sync	LinkedIn (+ Premium, Sales Navigator, Recruiter)	External-integration phase; Atwe's strategy is to BE the lightweight CRM first.
Status & channel ads / paid channels	WhatsApp & WhatsApp Business	Monetization phase 2; feed ads + boosts cover launch revenue.
Bot API	Telegram (+ Premium, Bots)	A developer-platform bet; premature pre-launch. Atwe AI is the in-house automation path.
Mini apps / web apps	Telegram (+ Premium, Bots)	Same platform bet; revisit after scale.
Guest AI bots / bot-to-bot	Telegram (+ Premium, Bots)	Ecosystem feature dependent on the Bot API above.
Inline bots	Telegram (+ Premium, Bots)	Same family as Bot API.
Gifts & collectible gifts	Telegram (+ Premium, Bots)	Cosmetic collectibles suit consumer social; Atwe's gift cards carry real value instead.
Ad revenue sharing	Telegram (+ Premium, Bots)	Requires a mature ads marketplace; revisit when channel ads exist.
Native A/B testing	Shopify	Optimization tooling for mature stores; premature.
Shopify POS	Shopify	Retail hardware is a separate business; Atwe QR + payment links cover casual in-person selling today.
Same-day local delivery (Uber Direct)	Shopify	Courier-network integration; far future.
Shop Campaigns across AI/ad channels	Shopify	External ad-network play; not Atwe's game yet.
Capital / lending	Shopify	Regulated lending product; only sensible at large GMV with a partner.
Multi-store / heatmap analytics	Shopify	Enterprise analytics; premature.
Agentic storefronts / Catalog (UCP)	Shopify	Watch the space; not actionable pre-launch.
Effects, filters & templates	TikTok & TikTok Shop	Consumer-creator tooling; weak fit for business content. iOS-native capture covers basics.
Duet / Stitch	TikTok & TikTok Shop	Entertainment mechanic; low business value.
Creator rewards / fund	TikTok & TikTok Shop	Platform-funded pool; same reasoning as X revenue sharing.
Sample management	TikTok & TikTok Shop	Ops tooling for a mature affiliate marketplace; later.
Authentication guarantee	eBay	Physical authentication ops; not Atwe's category.
Global shipping program	eBay	Cross-border logistics program; revisit at international scale.
Spoiler channels	Discord	Gaming-culture mechanic; no business fit.

FEATURE	BENCHMARK SOURCE	WHY YOU PROBABLY DON'T NEED IT (RECOMMENDATION ONLY — KEPT IN THE AUDIT ABOVE)
Server tags & per-server profiles	Discord	Identity-fragmentation feature; one professional identity is Atwe's point.
Soundboard & effects	Discord	Entertainment mechanic; no business fit.
Activities (embedded apps/games)	Discord	Gaming feature; skip.
Bots & integrations	Discord	Developer platform phase.
Server boosts	Discord	Consumer-social gamification; weak business fit.
System audio share	Slack	Browser-support-dependent nicety.
AI-suggested sidebar sections	Slack	Micro-optimization; skip.
Skills (reusable AI)	Slack	Follow-on to a mature agent platform.
App marketplace / integrations	Slack	Developer-platform phase; the moat today is built-in breadth.
Breakout rooms	Microsoft Teams	Enterprise-meeting depth; far future.
Phone system / PSTN	Microsoft Teams	Telephony carrier product; out of scope.
Tabs & app integration	Microsoft Teams	Integration-platform phase.
Loop components	Microsoft Teams	Office-ecosystem tech; group cloud covers shared state.
Copilot agents / Copilot Studio	Microsoft Teams	After the built-in agent matures.

Surprise Features — in the code, not in your PDF

Functionality that exists and works in Atwe today but appears nowhere in the 33-page specification. This is competitive surface you already own — worth marketing, documenting, and protecting. 56 items across 7 groups.

Money & Wallet 9

- ★ **Split a bill** — Splitwise-style shares with @username picker, DM pay-cards, idempotent claim-first payment.
- ★ **Money pools** — Group fundraising toward a goal with progress bars and DM share cards.
- ★ **Money requests** — Ask-to-pay with payer-side pay/decline, claim-first race safety.
- ★ **Savings pots / goals** — Wallet sub-balances with targets — zero-sum, row-locked.
- ★ **Scheduled & recurring payments** — Standing orders with pause/resume, failure retries, auto-pause.

Commerce 9

- ★ **Rentals** — Per night/day/week/month listings with date-range booking, host confirm, wallet pay — an Airbnb-style vertical the spec never mentions.
- ★ **Quotes / estimates** — Priced proposals that convert to invoices on accept — the trades/agency 'win the job' layer.
- ★ **Subscribe & Save** — Recurring product delivery with discounts, interval picker, failure handling.
- ★ **Booking deposits in escrow** — Refundable service deposits held and settled on completion.

Social & Content 7

- ★ **Postshot** — Render any post to a clean shareable PNG (canvas-painted, theme-aware) with forward/share/download.
- ★ **Cashtag finance cards** — Live \$TICKER quotes, canvas charts, inline sparkline cards — beyond what X ships.
- ★ **Co-author posts + tag people** — Collaborative posts with dual attribution.
- ★ **Peek deep links** — Signed-out visitors can view one shared public profile (X-style), then hit the gate — SEO + growth.

Networking & Hiring 5

- ★ **AI skill assessments** — 5-question AI-generated quizzes that award verified-skill badges.
- ★ **AI resumes** — Guided CV builder enriched from profile data, printable output.

Messaging (Beam) 9

- ★ **Live location sharing** — Bounded 15m/1h/8h streams with in-place SSE updates.
- ★ **Call links** — Shareable join-a-call links, no membership needed.
- ★ **View-once media** — True single-open photos/videos, bytes never shipped in the thread.
- ★ **Multiple threads per person** — Email-style side conversations with the same contact.
- ★ **Custom stickers + GIFs** — Uploaded sticker packs (transparency-preserving) + Tenor search.
- ★ **Chat export with ranges** — Readable transcripts with date filters, blocked for locked/private chats.

Platform & Admin (invisible to competitors' checklists) 10

- ★ **Staff RBAC** — 8 permission scopes, preset roles, per-tab dashboard gating.
- ★ **Audit log + platform activity feed** — Append-only staff accountability + an 'everything that happened' firehose.
- ★ **Support impersonation** — Time-boxed, reason-logged 'view as user' with every money route blocked.
- ★ **Appeals + GDPR data requests** — Suspension appeals from the sign-in screen; tracked DSR deadlines.
- ★ **Feature flags / kill switches** — Turn signups/posting/wallet/AI off platform-wide without a deploy.

Product & UX 7

- ★ **i18n** — 14 languages including RTL Arabic/Hebrew, build-free.
- ★ **Cold-start onboarding** — Goal → topics → people → tips, seeding the personalization signals on day one.
- ★ **Feature-intro sheets** — One-time per-world welcome cards.
- ★ **App & section passcode locks** — Native-style passcode pad protecting the app, Wallet, Storefront.

- ★ **Referral program** — \$5/\$5 two-sided wallet bonus with share links and idempotent claims.
- ★ **Loyalty / rewards points** — ~1% back on purchases, tiers (Bronze → Platinum), redeem to wallet.
- ★ **Admin card program** — Company-issued gift cards, fraud freeze/unfreeze, outstanding-liability reconciliation that balances to the cent.
- ★ **Anti-fraud stack** — Velocity caps, wallet freeze, client+server idempotency, claim-before-charge, webhook dedup, non-negative balance DB constraint — a real fintech backbone.

- ★ **Digital auto-delivery** — Paid digital goods delivered instantly into the DM thread.
- ★ **Services & Local hub** — A 'find a plumber/magician/tutor' directory + one unified local search across services, businesses, listings, jobs, events.
- ★ **Trust score** — A 0–100 marketplace credibility score from tenure, completed orders, ratings, verification — with tiers.
- ★ **Two-way reviews** — Sellers rate buyers, feeding the trust score.
- ★ **Sales tax + carrier-rate modules** — Layered, gracefully-degrading tax and live shipping-rate quoting.

- ★ **Rich OG link previews** — Server-rendered unfurls for profiles/groups/circles on WhatsApp/iMessage/Slack.
- ★ **Undo toast** — 10-second post-undo.
- ★ **Close Friends + Highlights** — Private story audiences and permanent profile story collections.

- ★ **Ask for a referral** — Finds your connections who work at the hiring business.
- ★ **Profile strength meter** — 9-item completeness coach.
- ★ **Reverse contacts** — See who saved YOU as a contact.

- ★ **Silenced unknown callers** — WhatsApp-style unknown-caller silencing with a 'Silenced' call log.
- ★ **Group Cloud** — A shared drive per group with 7 tool kinds: files, sheets, checklists, notes, forms, schedules/rotas, rosters, expense logs — plus AI checklists from chat. Quietly one of Atwe's biggest differentiators.
- ★ **Chat wallpapers, labels, locked chats, broadcast lists** — The whole WhatsApp-Business power set, already live.

- ★ **Background-job health** — Every money flusher monitored with staleness detection.
- ★ **Reserved-username marketplace** — Premium handle inventory, seeding tiers, self-serve paid claims — a revenue line the spec never imagined.
- ★ **AI moderation scans** — One-click AI sweeps of posts/groups/listings/profiles/ads with warn/suspend/ban/delete actions.
- ★ **Traffic, growth, finance, revenue dashboards** — Visitor analytics, DAU/WAU/MAU, custodial-float reconciliation, company revenue ledger.
- ★ **Demo mode** — Seed ~100 tagged demo accounts to preview a busy platform; one-click teardown.

- ★ **Agenda + ICS export** — Unified appointments/events calendar with Add-to-Calendar.
- ★ **Events with tickets & capacity** — Paid ticketing and seat caps.
- ★ **Atwe Ads** — A full sponsored-display product with review queue, impression/click tracking, revenue ledger.

Possible Duplicates — overlapping features

Places where more than one feature solves the same member problem, with a merge / keep / clarify recommendation for each. Most overlaps turn out to be deliberate and healthy; the recommendations focus on presentation, not deletion.

1. Five 'save' systems

What overlaps: Post bookmarks (+folders), feed-post saves, starred messages, product wishlist, saved jobs/candidates/searches.

Recommendation: Keep the storage separate (each has distinct semantics) but ship ONE 'Saved' hub in the Me tab that lists all of them — members shouldn't memorize five entry points.

2. Four grouping primitives

What overlaps: Circles (official industries), Feeds (joinable broadcast), Communities (group-of-groups), Lists (curated accounts).

Recommendation: Functionally distinct but conceptually crowded. Write a one-line positioning for each in onboarding/help; longer-term consider folding Feeds into Communities' announcement-channel pattern.

3. Four advertising products

What overlaps: Promote-a-post, job boosts, Atwe Ads campaigns, sponsored listings.

Recommendation: Deliberate (different auction mechanics) and already aggregated read-only in Ads Manager. Recommendation: one 'Advertise' entry point that routes by goal, shared budget UX. Don't merge the engines.

4. Seven ways to ask for money

What overlaps: Invoices, quotes, money requests, offers, splits, payment links, tips.

Recommendation: Each maps to a real business scenario — keep all seven, but the wallet 'Request' action should present a chooser ("What kind of request?") so members discover the right instrument.

5. Two saved-search tables

What overlaps: saved_searches (jobs) vs saved_market_searches (marketplace).

Recommendation: Same concept, parallel code. Merge candidate at the next schema pass; low urgency.

6. Three review systems + trust score

What overlaps: Product reviews, business reviews, buyer reviews.

Recommendation: Deliberate and correct (different subjects). Trust score already unifies them — no change.

7. Three professional-identity forms

What overlaps: Profile experience/skills, worker listing, AI resumes.

Recommendation: Recommendation: auto-build resume drafts from the profile and prompt workers to sync their listing — reduce triple entry.

8. Many AI endpoints

What overlaps: ai/write, explain, digest, for-you, agent, jobmatch, shop, resume, alt-text, cs-answer...

Recommendation: Healthy (each is scoped + rate-limited). Ensure the Atwe AI tab remains the one front door that routes to all of them.

9. Paid-content vehicles

What overlaps: Creator subs, PPV posts, paid newsletters, paid courses.

Recommendation: All four earn their place; recommendation: a single 'Monetization' hub page for creators showing all levers and earnings together.

Architecture Notes

Dead code, scaling constraints, security posture, and testing reality — the things that could become problems later, stated plainly. Overall: the codebase is unusually disciplined for its size (documented invariants, money-safe transactions, graceful degradation of every external dependency), with one dominant scaling decision to make before growth: media storage.

Dead & dormant code

- Dormant `company_*` tables/columns and the `company_job` notif type — superseded by business accounts. Don't build on them; drop at the next schema cleanup.
- Guest-mode plumbing (`guestLogin`, `S.guest`, `guest localStorage` caches) — inert since the mandatory login gate. The peek flow reuses a slice deliberately.
- `circles.username + /circle/:username` deep link — dormant by design (official circles have no handles).
- `MODELS` selector in the AI tab is cosmetic (both labels map to one model id).
- `PROF_VIEWERS_PRO_GATED` and similar launch flags are OFF — intentional dormant monetization switches, not dead code.

Scalability

- `MEDIA IN POSTGRES (#1)`: images/video/audio live as base64 data-URLs in table rows, with a 4MB JSON body cap. This is why HD media, long video, and large files are Partial. Move to object storage (S3/R2) + CDN with signed uploads BEFORE the iOS app and public growth; migrate hot rows lazily.
- Single-node in-memory state: SSE client map, presence, rate-limit buckets, live streams/call rooms, ad-auction cache, geo caches. Fine on one Railway instance; horizontal scaling needs Redis (pub/sub + shared buckets). Not urgent at friends-scale — plan it.
- Realtime on SSE: solid for web; the iOS app must rely on APNs push (web-push infra exists; add an APNs provider) since sockets die in the background.
- Message search is `ILIKE`: correct and injection-safe, but needs `pg_trgm/FTS` indexes at scale (marketplace search already uses FTS — same pattern).
- AI chats store the whole conversation as one JSONB blob — large threads rewrite the row each save. Acceptable; cap or paginate someday.
- Group calls are mesh-capped at 8 — real meetings need an SFU (LiveKit/mediasoup). This is the infra behind the 'video meetings' Partial.
- `server.js` and `index.html` are single files (by convention). It works and is documented; the iOS app should consume a versioned API layer — a good moment to write an OpenAPI spec of the existing routes.

Security posture

- Strong, unusually well-documented posture: zero-sum wallet ledger with DB-level non-negative constraint, claim-before-charge on every money path, kind-scoped idempotency, webhook event dedup with money-safe claim retention, ambiguous-error handling on payouts, per-row ownership everywhere, two-way block enforcement, RBAC + audit + impersonation money-blocks.
- Honest non-E2EE messaging disclosure — keep the wording; never market it as E2EE.
- Shippo webhook is authenticated only by a query-string shared secret (documented; Shippo doesn't sign). Acceptable; keep the secret long and rotate.
- Known bounded races are documented (coupon last-slot across two distinct buyers, event-capacity soft cap) — monitor, don't fix prematurely.
- Rate limits are per-node in-memory — a multi-instance deploy would weaken them until Redis lands (same item as scaling).
- JWTs are 30-day + revocable session store; password reset revokes all sessions. Good. Passkeys remain the missing modern factor.

Testing & maintainability

- Automated coverage exists ONLY for money/auth invariants (npm test, skips without a DB) — it covers the riskiest surface well (races, idempotency, escrow, gift cards).
- The 16k-line frontend has zero automated tests — all UI verification is manual/Playwright-ad-hoc. Before iOS work, capture the critical flows as a smoke checklist.
- No linter — convention is documentation-enforced (CLAUDE.md). Works with one maintainer + AI; revisit when a team joins.
- Recommend a pre-public-launch load test of `/api/social/feed`, `/api/atchat/conversations`, and the SSE stream at ~1k concurrent (the fan-out and feed queries are the hot paths).

Prioritized engineering recommendations

- 1) Object storage + CDN for media (unblocks 6+ Partial features).
- 2) OpenAPI spec of existing routes → shared types for the iOS app.
- 3) APNs push provider alongside web-push.
- 4) Redis when the second instance is needed (SSE pub/sub, rate limits, presence).
- 5) `pg_trgm` indexes on message/product search when volume grows.
- 6) SFU evaluation (LiveKit) when meetings > 8 or recording lands.
- 7) Schema hygiene pass post-launch: drop `company_*`, merge saved-search tables.

Bottom line. Nothing here blocks the public launch. Item 1 (media to object storage + CDN) is the one decision that should land before the iPhone app and marketing push, because six Partial features and the app's perceived quality all sit behind it.
